At Net is a leading telecommunications company specializing in providing cutting-edge technology solutions in the fields of WiFi, Fiber-to-the-Home (FTTH), Voice over Internet Protocol (VoIP), and Global Positioning System (GPS), website development, and Closed-Circuit Television (CCTV) installations. With a commitment to innovation and customer satisfaction, At Net has established itself as a trusted provider of reliable and high-quality services.

Services:

1. WiFi Solutions:

- **At Net offers comprehensive WiFi solutions for residential, commercial, and enterprise environments. Their services include WiFi network design, installation, maintenance, and optimization, ensuring seamless and high-speed connectivity for their clients.**

2. Fiber-to-the-Home (FTTH):

- **At Net is at the forefront of FTTH deployment, bringing ultra-fast and reliable internet connectivity directly to homes and businesses. They provide end-to-end FTTH solutions, including network design, installation, and maintenance, enabling customers to enjoy high-speed internet access.**

3. Voice over Internet Protocol (VoIP):

- **At Net offers advanced VoIP solutions that leverage internet protocol networks for voice communication. Their VoIP services include hosted PBX systems, SIP trunking, IP telephony, and unified communication solutions, enabling businesses to enhance their communication capabilities.**

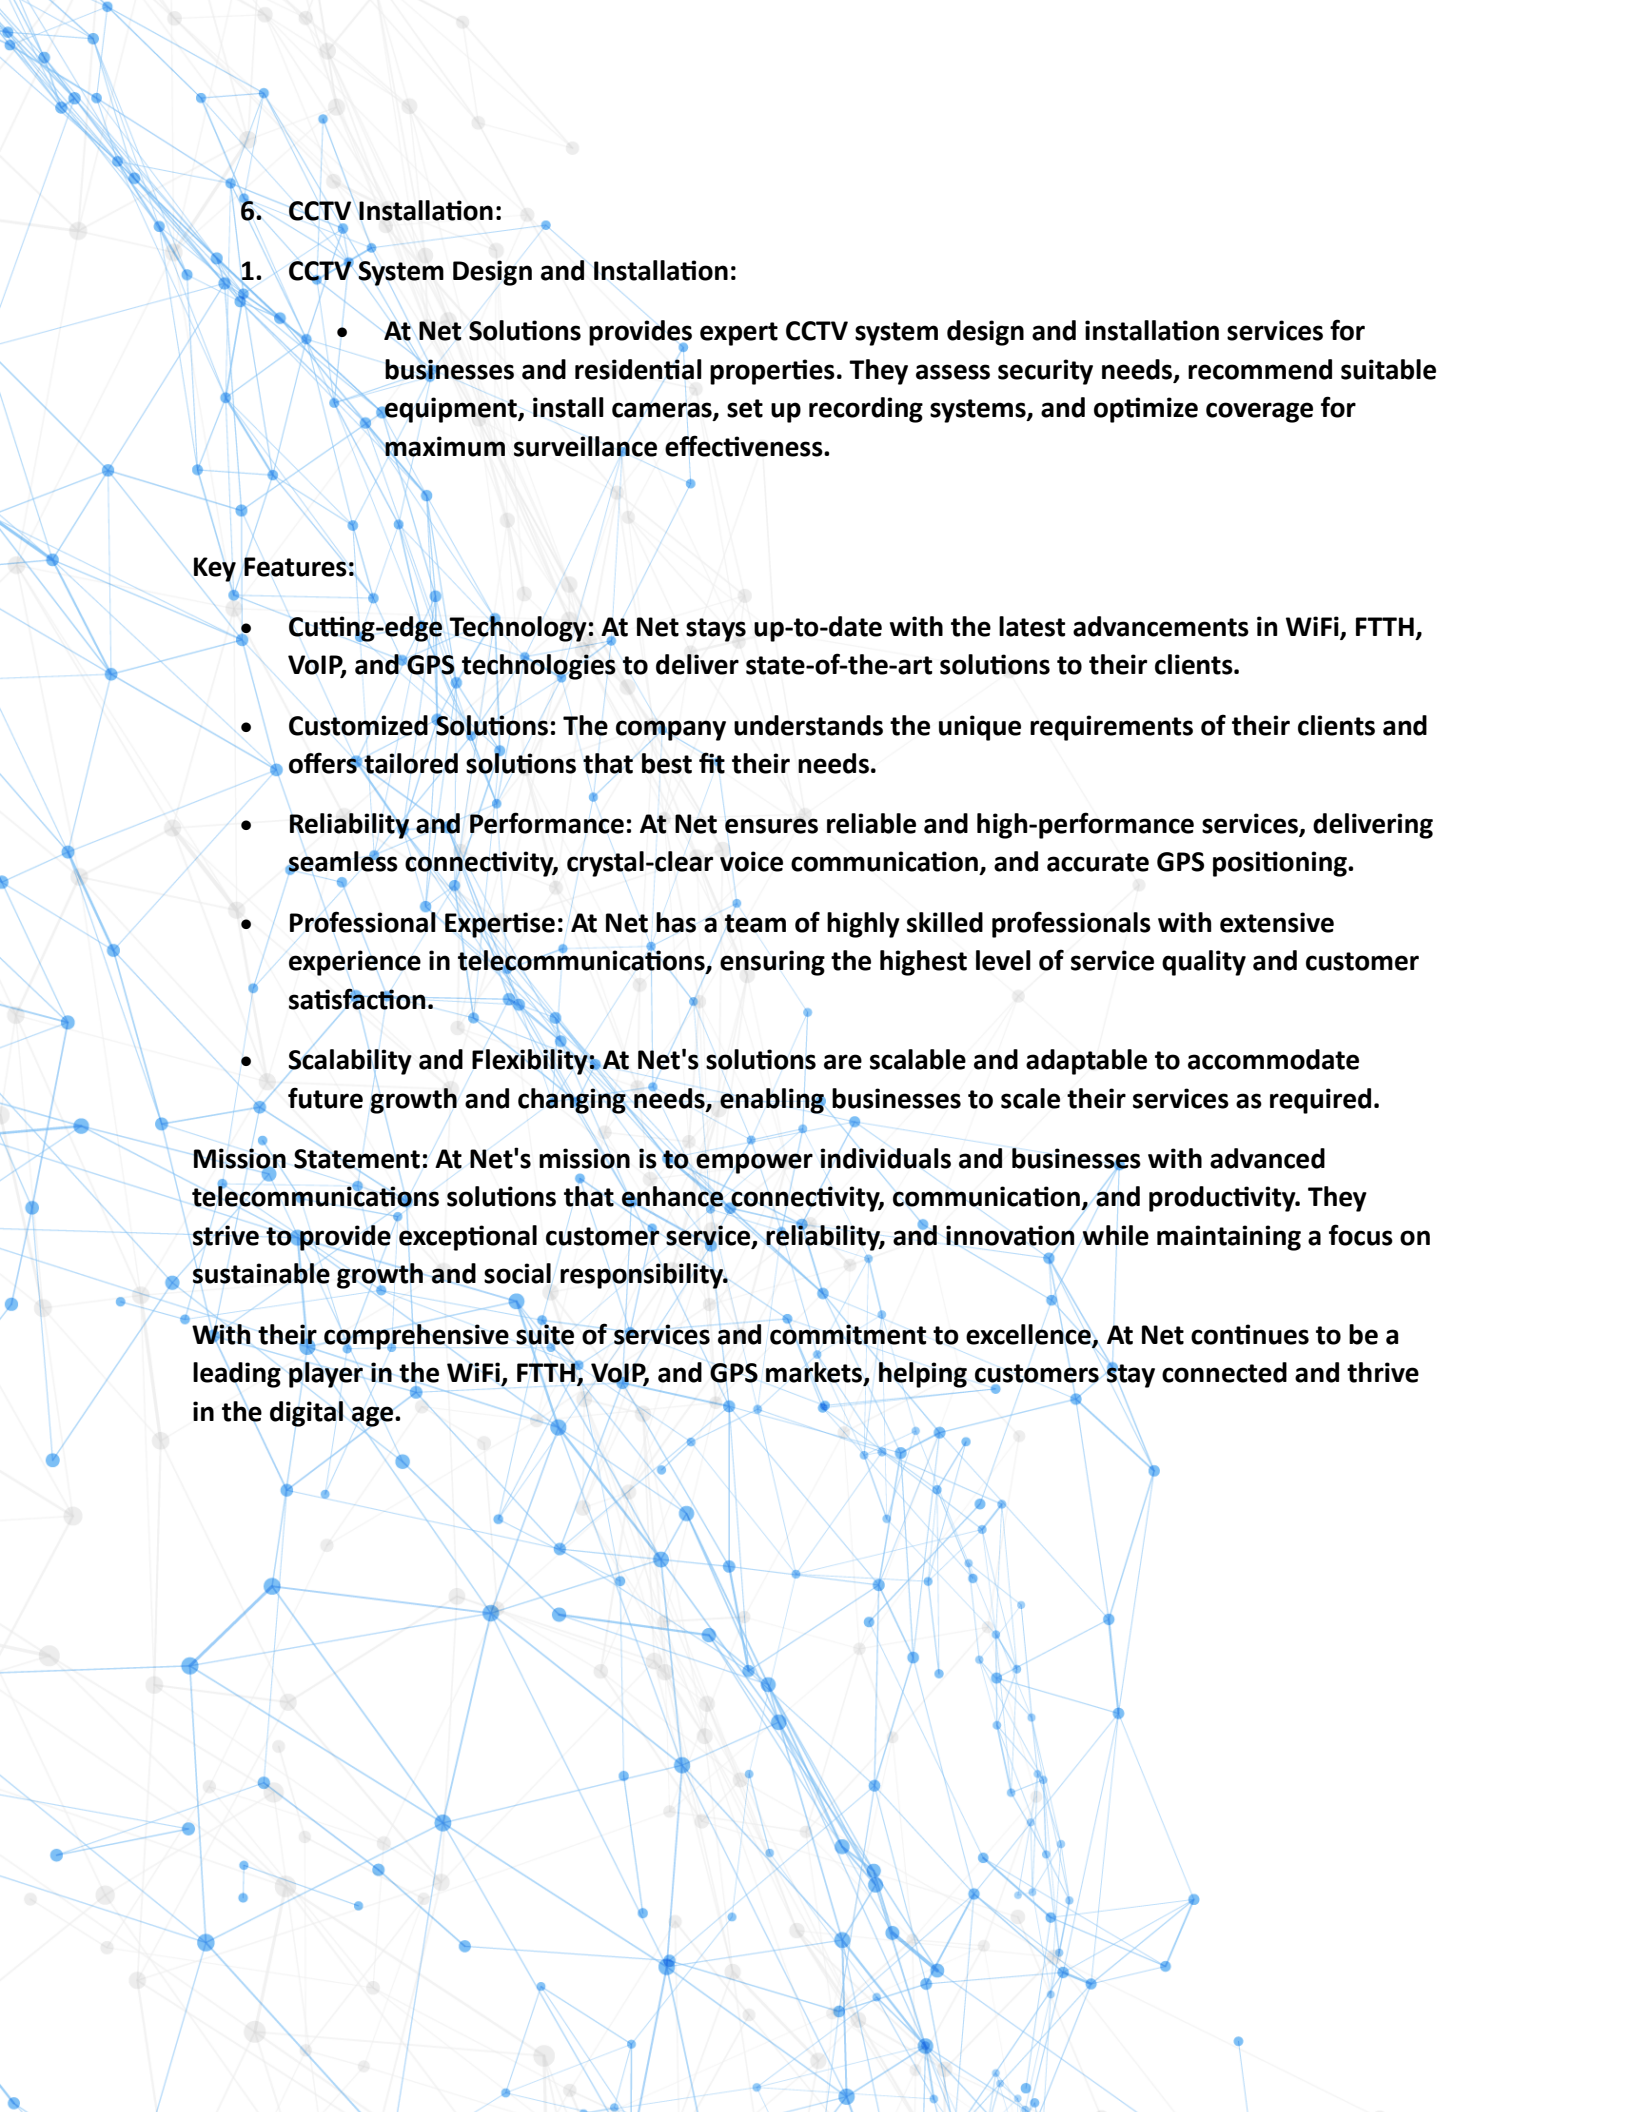

4. Global Positioning System (GPS):

- **At Net provides GPS solutions that utilize satellite technology for accurate positioning, tracking, and navigation. Their GPS services cater to various industries, including transportation, logistics, fleet management, and personal tracking, helping businesses optimize their operations and enhance safety.**

5. Website Development Services:

1. Custom Website Design and Development:

- **At Net Solutions specializes in creating custom websites that align with clients' branding, goals, and target audience. Their services include website design, development, responsive layouts, e-commerce functionality, content management systems, and search engine optimization.**

6. CCTV Installation:

1. CCTV System Design and Installation:

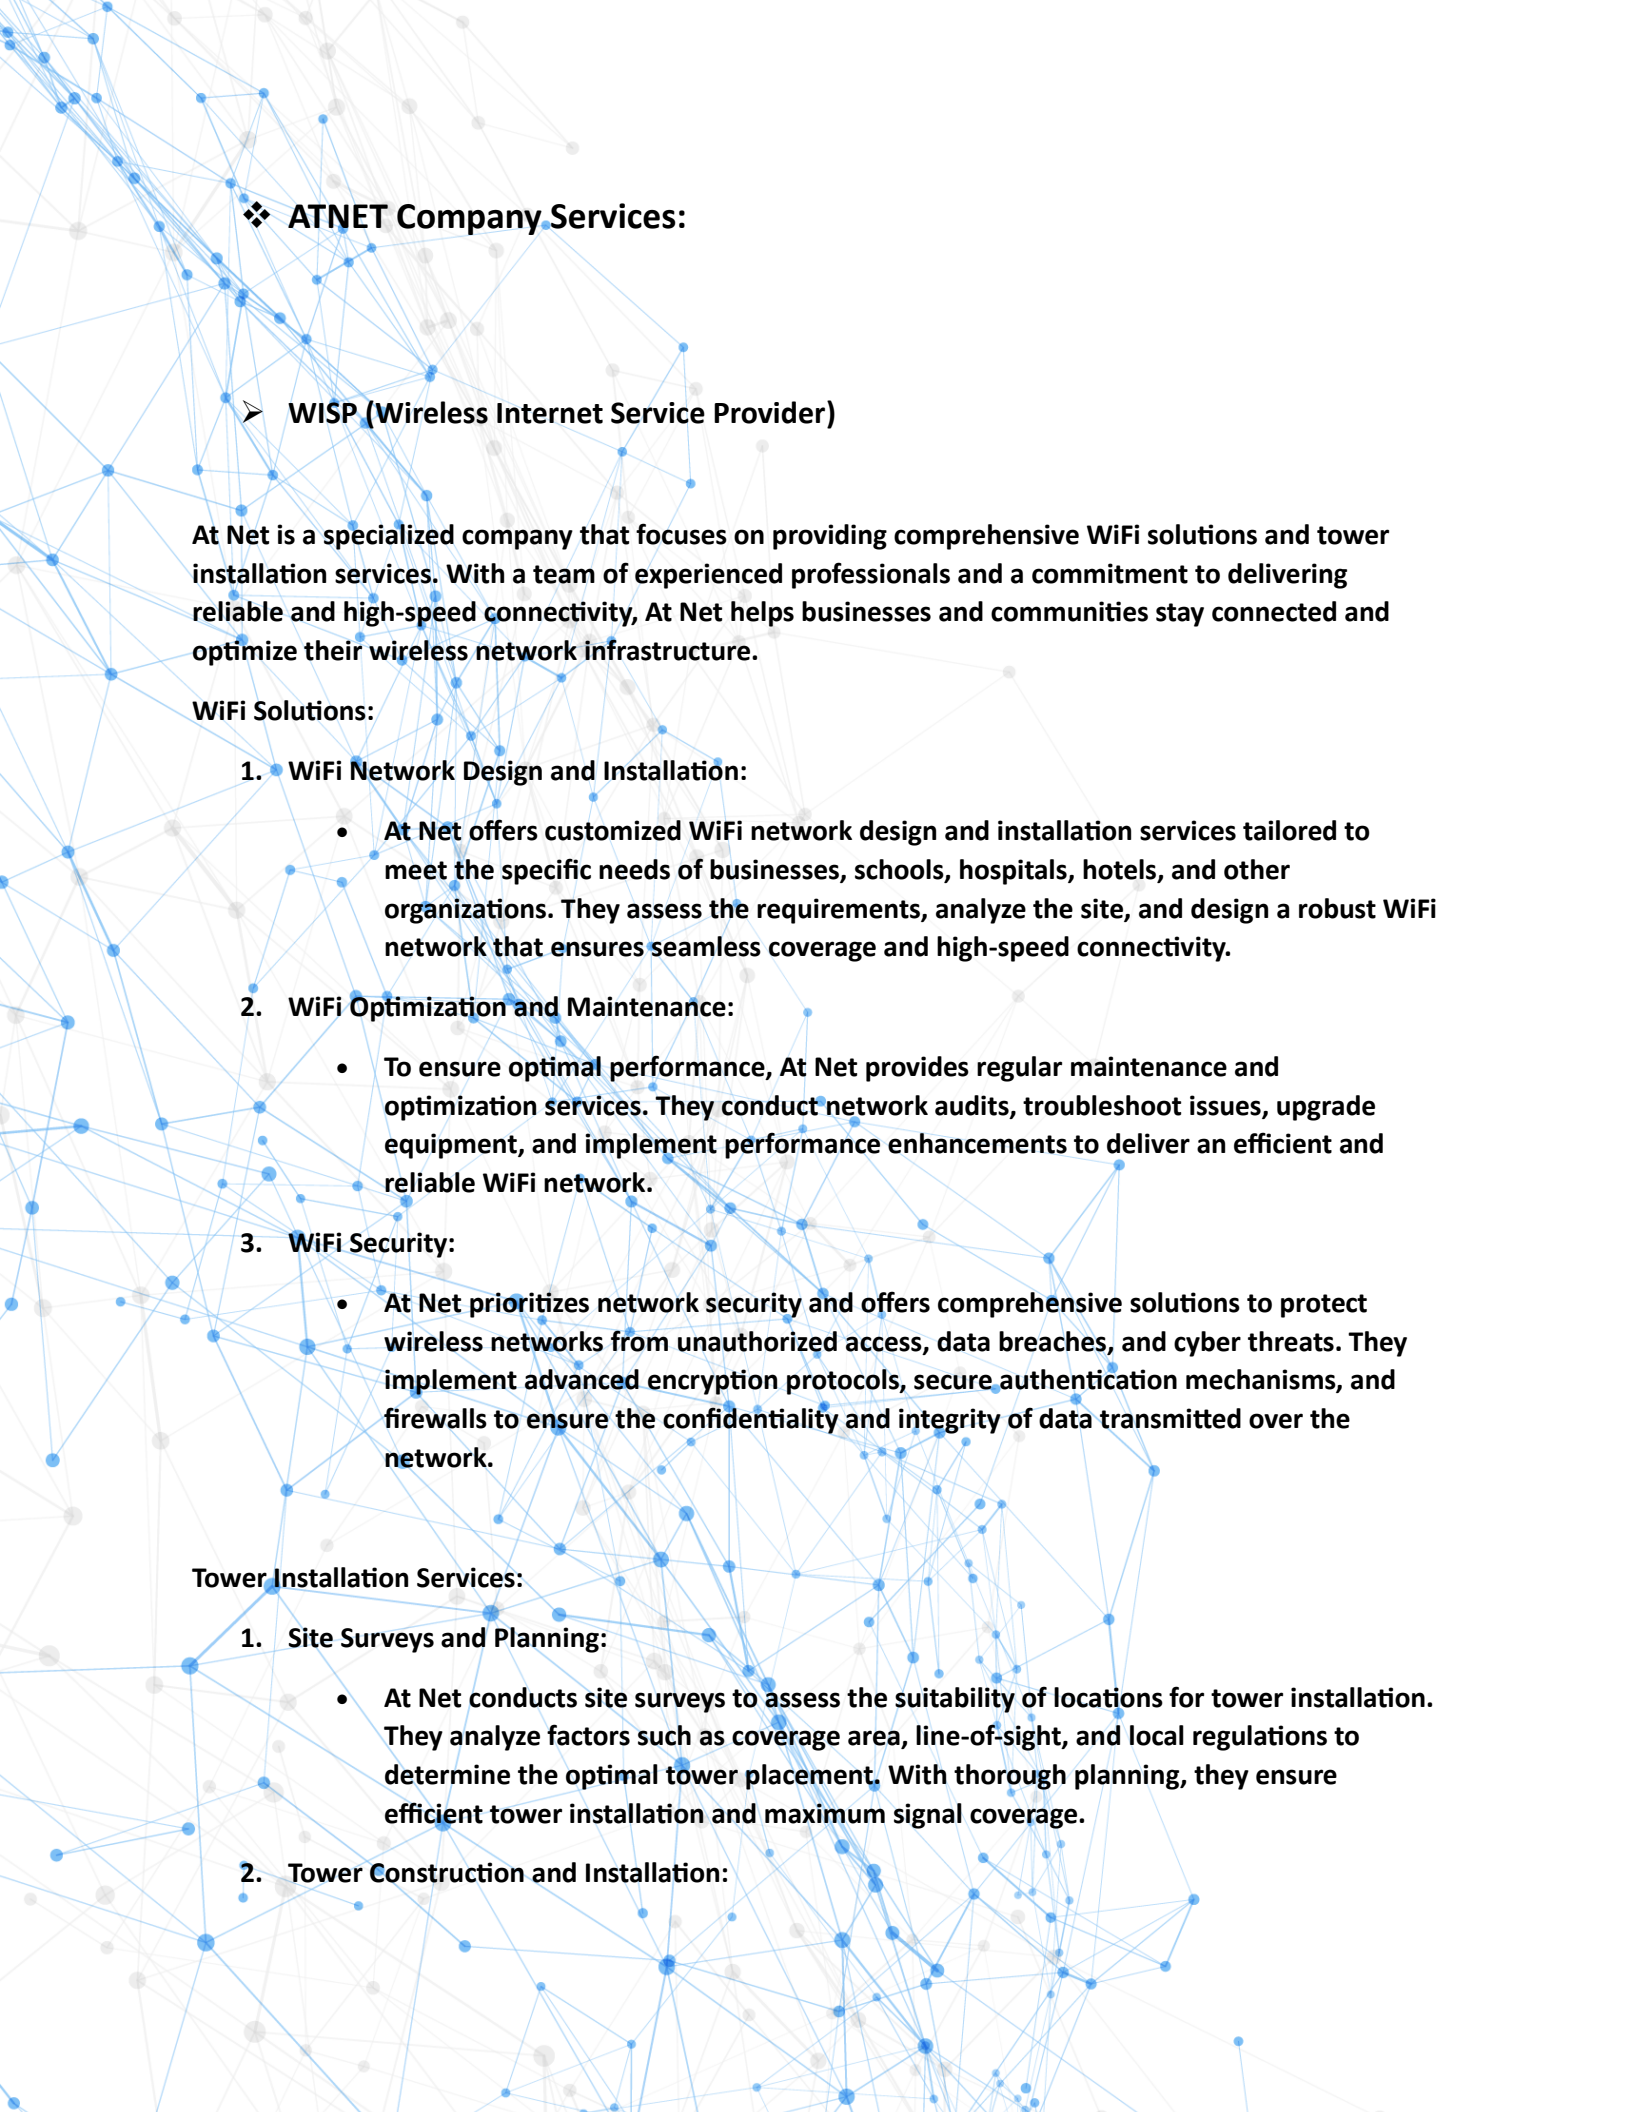

- At Net Solutions provides expert CCTV system design and installation services for businesses and residential properties. They assess security needs, recommend suitable equipment, install cameras, set up recording systems, and optimize coverage for maximum surveillance effectiveness.

Key Features:

- **Cutting-edge Technology:** At Net stays up-to-date with the latest advancements in WiFi, FTTH, VoIP, and GPS technologies to deliver state-of-the-art solutions to their clients.
- **Customized Solutions:** The company understands the unique requirements of their clients and offers tailored solutions that best fit their needs.
- **Reliability and Performance:** At Net ensures reliable and high-performance services, delivering seamless connectivity, crystal-clear voice communication, and accurate GPS positioning.
- **Professional Expertise:** At Net has a team of highly skilled professionals with extensive experience in telecommunications, ensuring the highest level of service quality and customer satisfaction.
- **Scalability and Flexibility:** At Net's solutions are scalable and adaptable to accommodate future growth and changing needs, enabling businesses to scale their services as required.

Mission Statement: At Net's mission is to empower individuals and businesses with advanced telecommunications solutions that enhance connectivity, communication, and productivity. They strive to provide exceptional customer service, reliability, and innovation while maintaining a focus on sustainable growth and social responsibility.

With their comprehensive suite of services and commitment to excellence, At Net continues to be a leading player in the WiFi, FTTH, VoIP, and GPS markets, helping customers stay connected and thrive in the digital age.

❖ ATNET Company Services:

➤ WISP (Wireless Internet Service Provider)

At Net is a specialized company that focuses on providing comprehensive WiFi solutions and tower installation services. With a team of experienced professionals and a commitment to delivering reliable and high-speed connectivity, At Net helps businesses and communities stay connected and optimize their wireless network infrastructure.

WiFi Solutions:

1. WiFi Network Design and Installation:

- At Net offers customized WiFi network design and installation services tailored to meet the specific needs of businesses, schools, hospitals, hotels, and other organizations. They assess the requirements, analyze the site, and design a robust WiFi network that ensures seamless coverage and high-speed connectivity.

2. WiFi Optimization and Maintenance:

- To ensure optimal performance, At Net provides regular maintenance and optimization services. They conduct network audits, troubleshoot issues, upgrade equipment, and implement performance enhancements to deliver an efficient and reliable WiFi network.

3. WiFi Security:

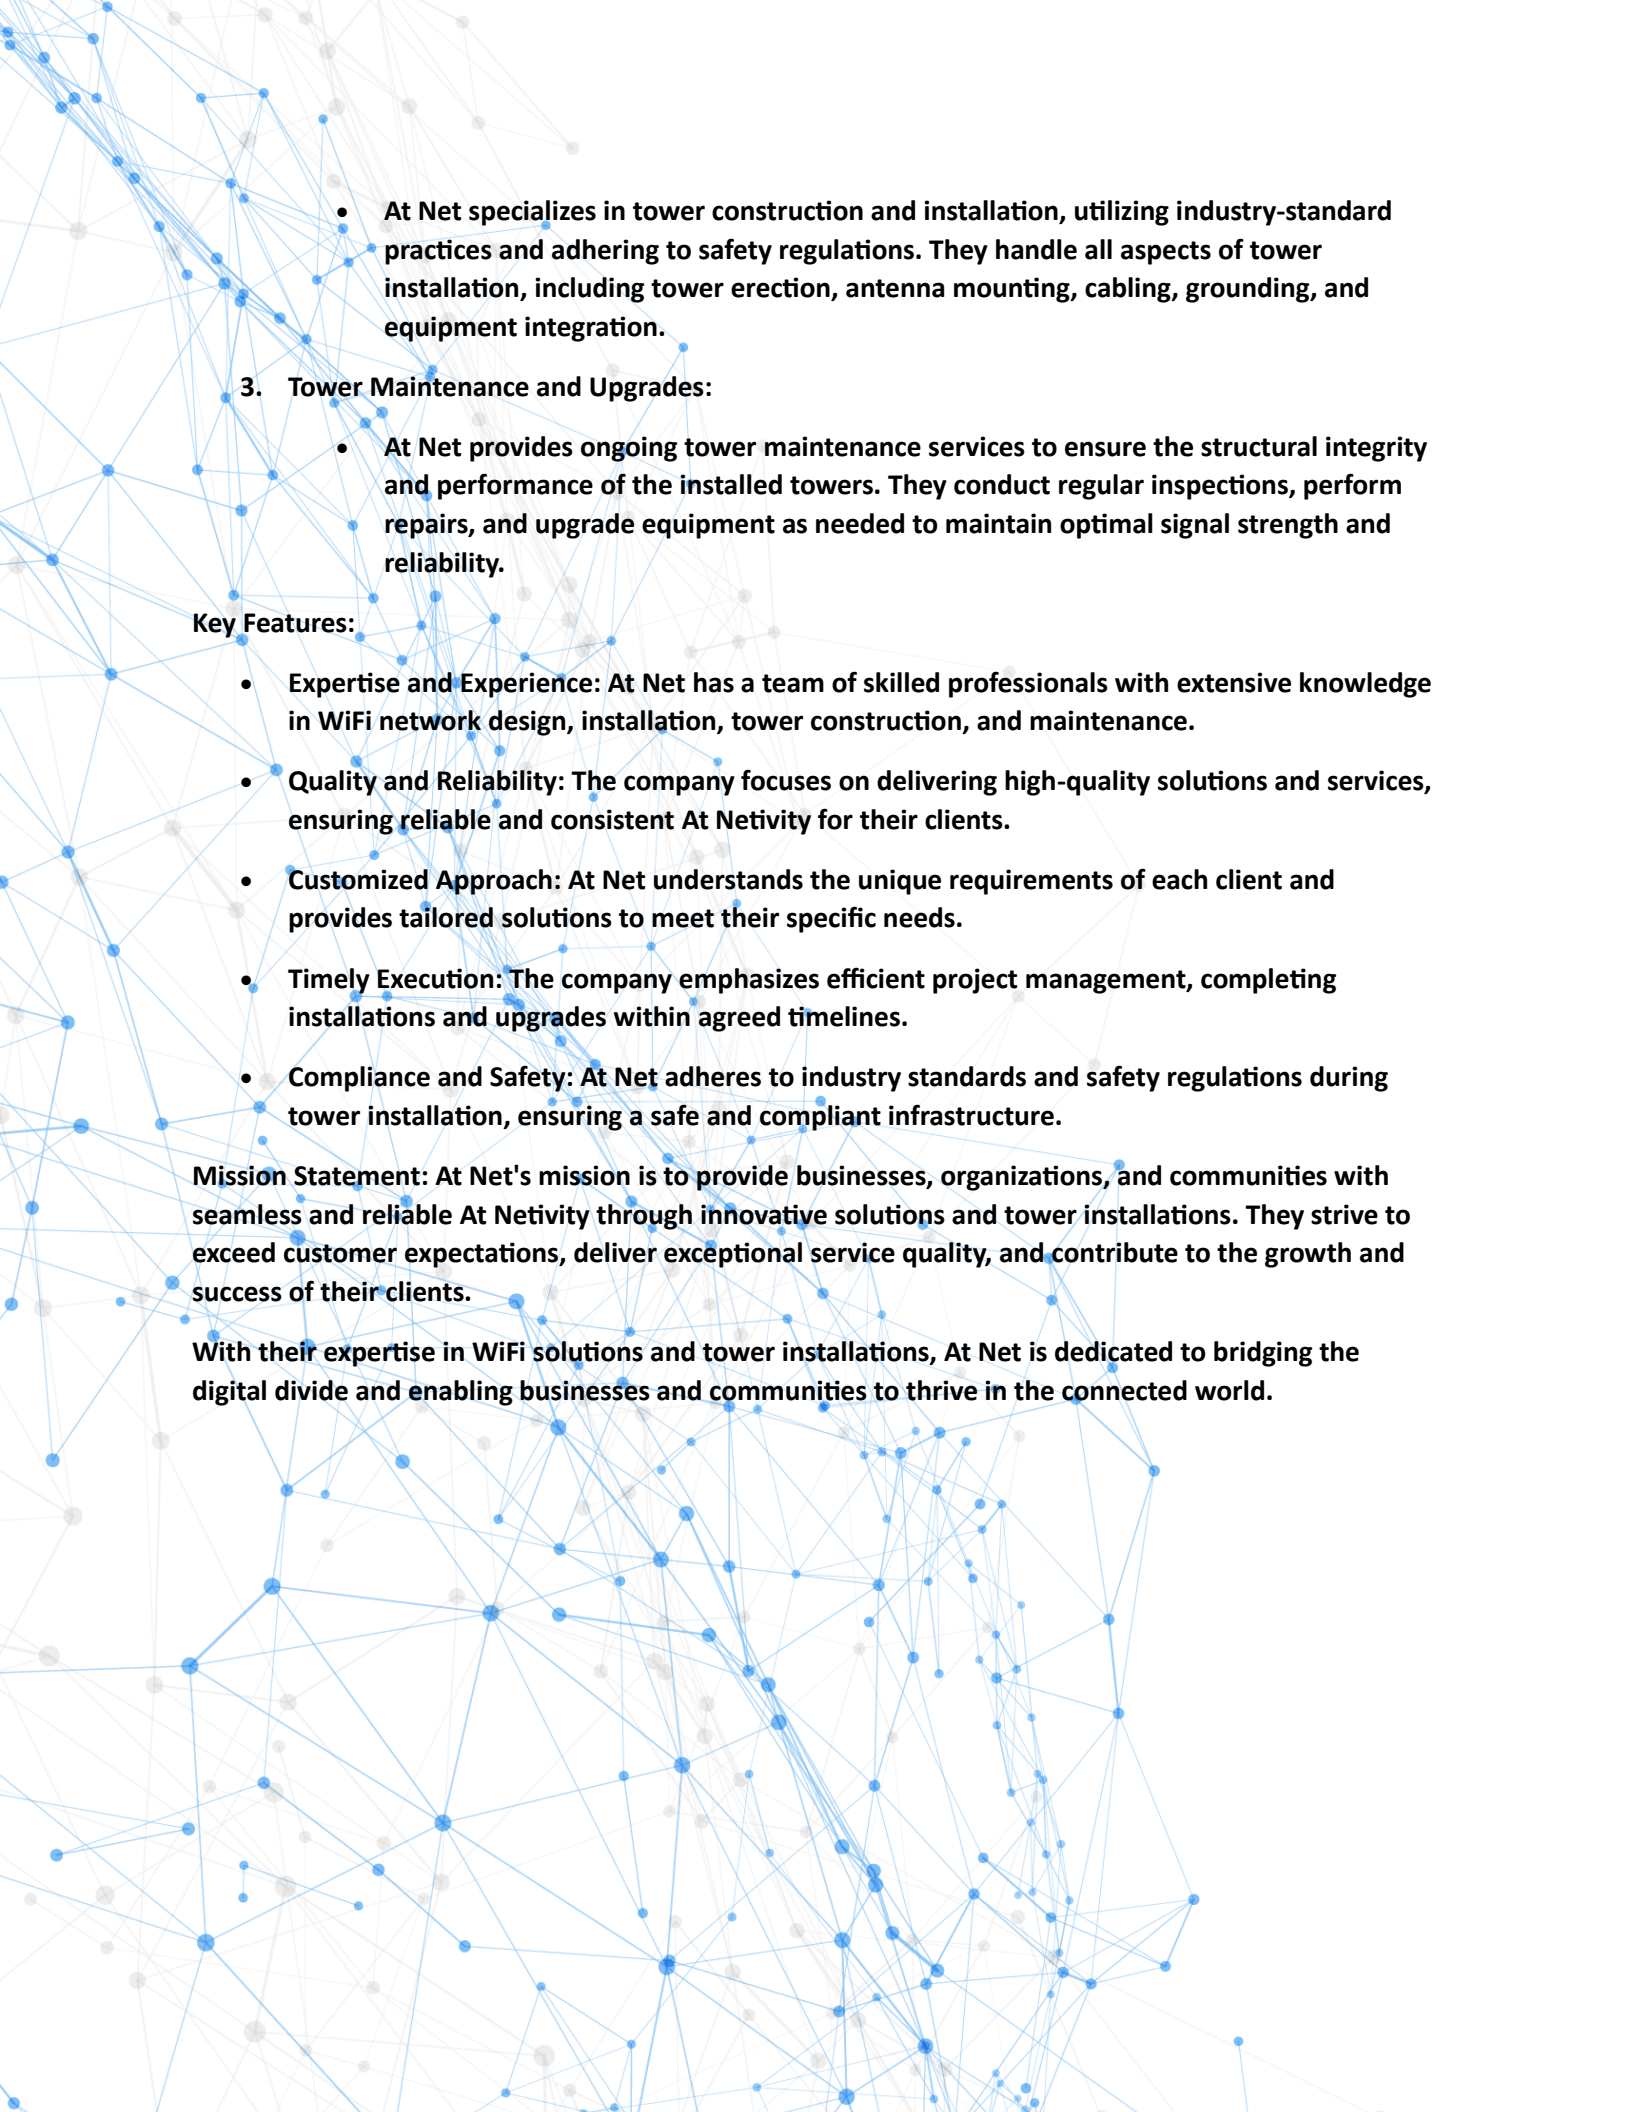

- At Net prioritizes network security and offers comprehensive solutions to protect wireless networks from unauthorized access, data breaches, and cyber threats. They implement advanced encryption protocols, secure authentication mechanisms, and firewalls to ensure the confidentiality and integrity of data transmitted over the network.

Tower Installation Services:

1. Site Surveys and Planning:

- At Net conducts site surveys to assess the suitability of locations for tower installation. They analyze factors such as coverage area, line-of-sight, and local regulations to determine the optimal tower placement. With thorough planning, they ensure efficient tower installation and maximum signal coverage.

2. Tower Construction and Installation:

- 
- At Net specializes in tower construction and installation, utilizing industry-standard practices and adhering to safety regulations. They handle all aspects of tower installation, including tower erection, antenna mounting, cabling, grounding, and equipment integration.

3. Tower Maintenance and Upgrades:

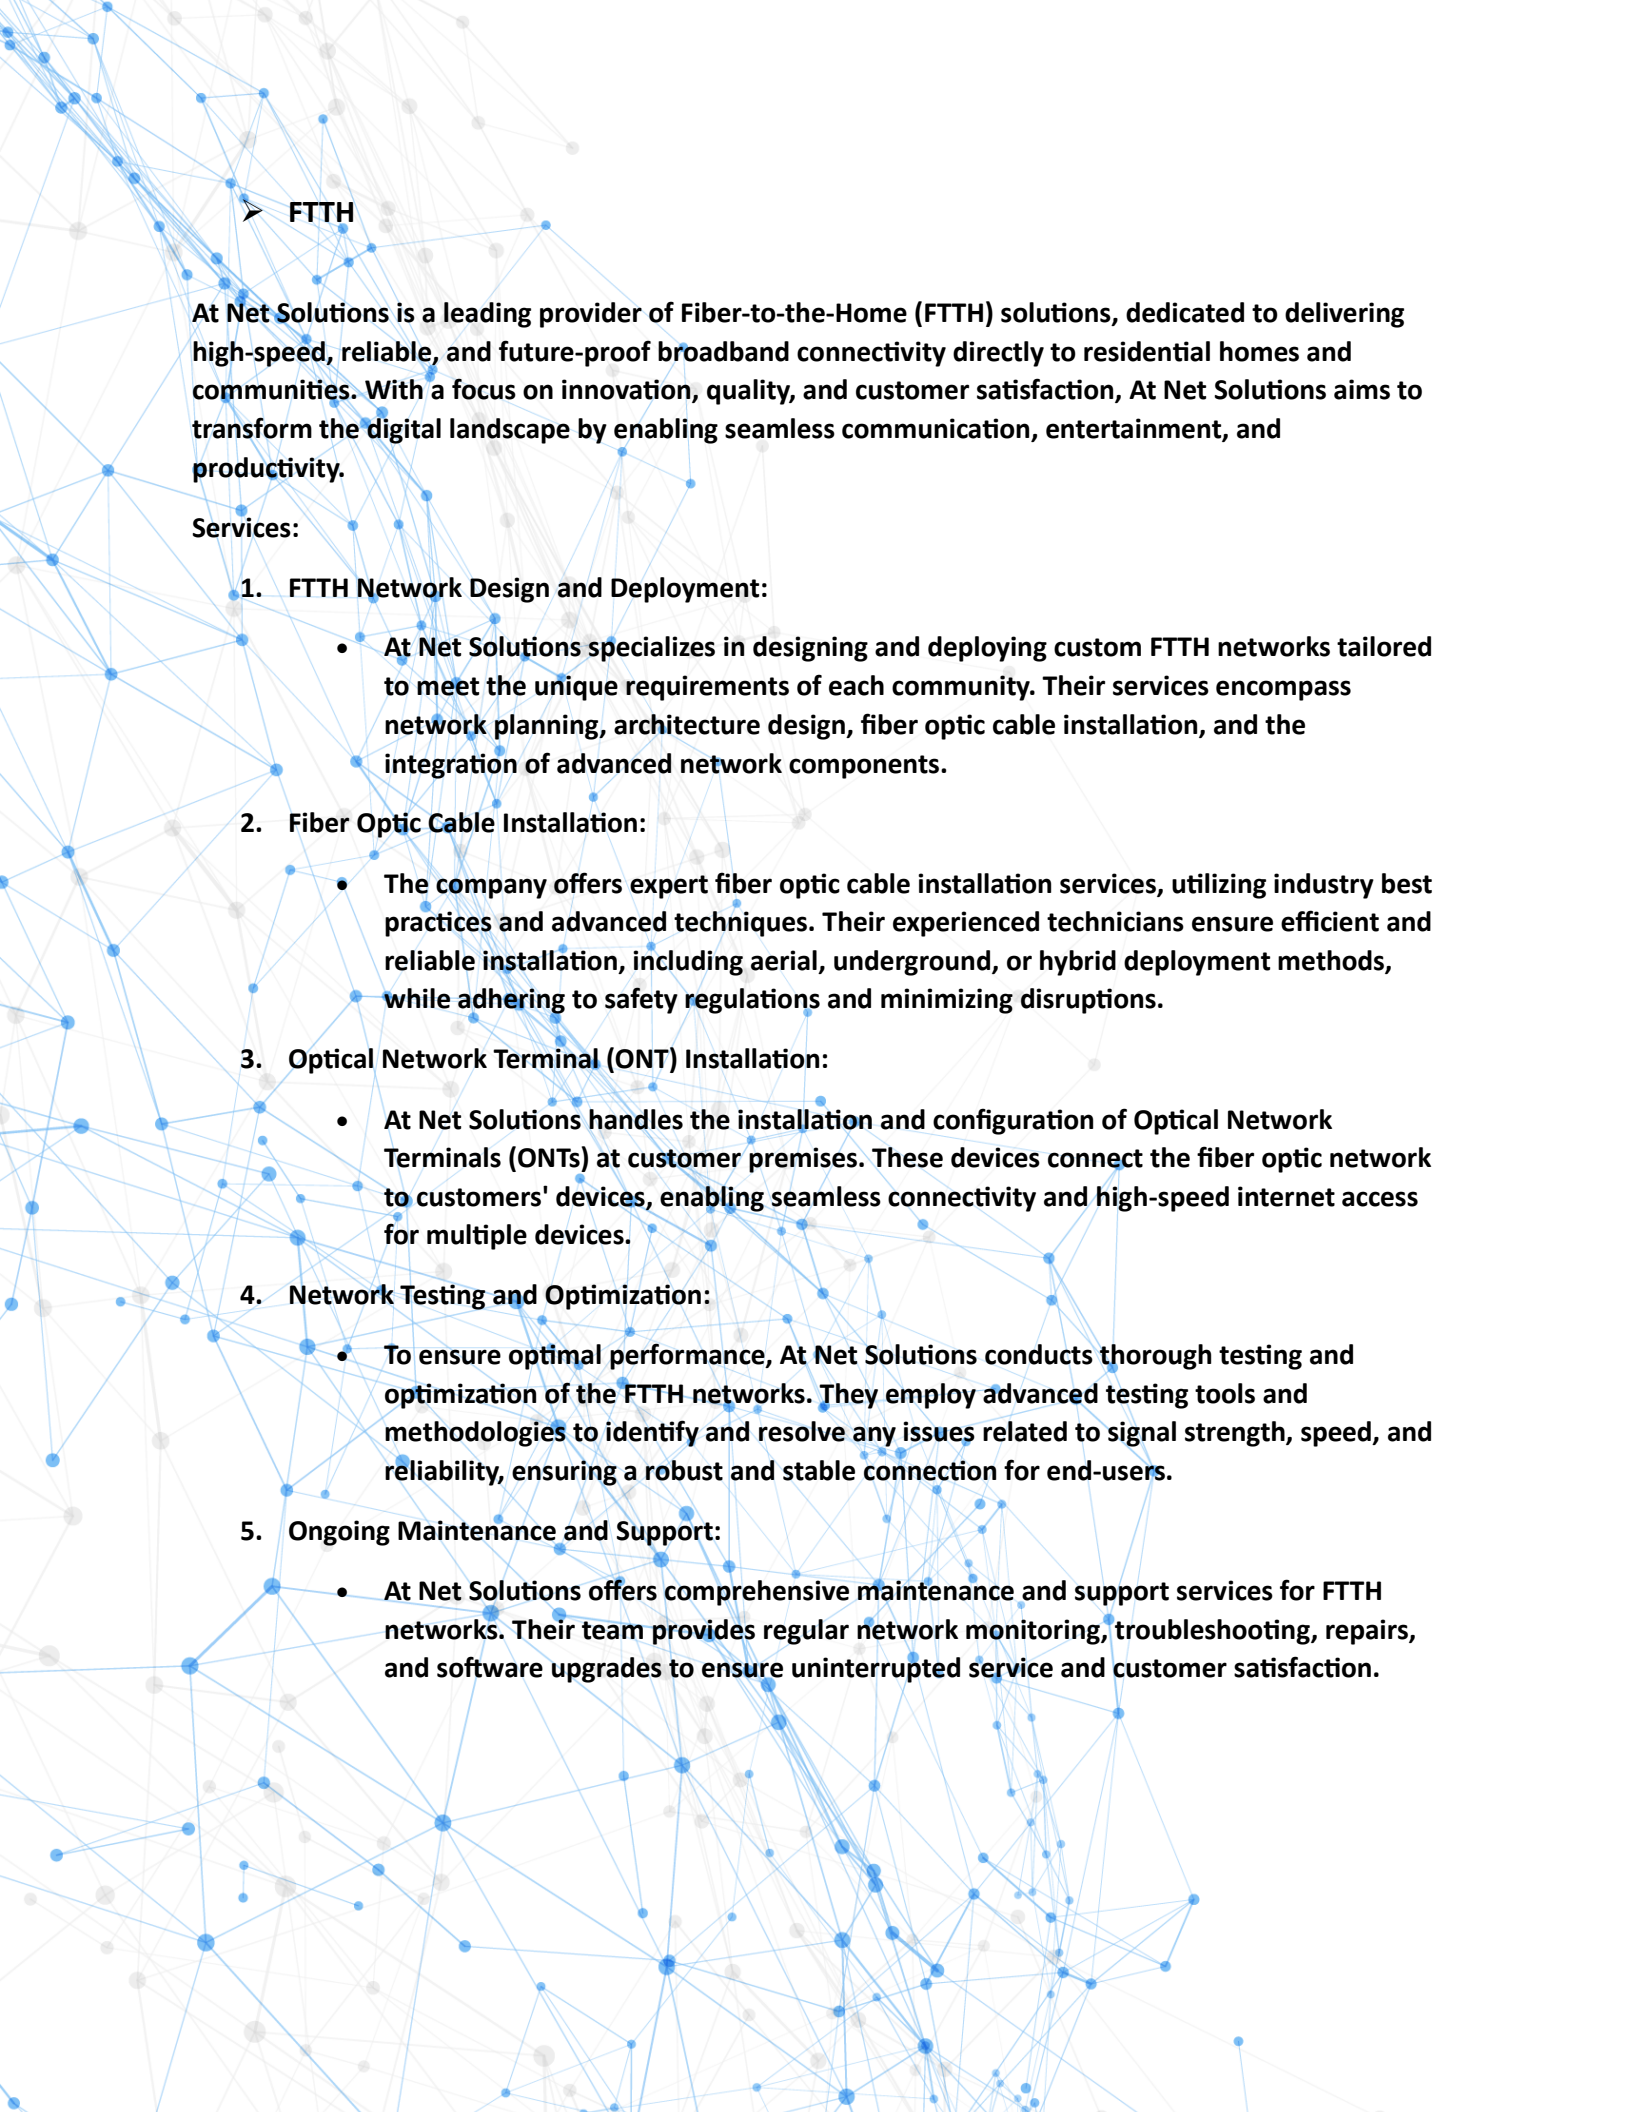

- At Net provides ongoing tower maintenance services to ensure the structural integrity and performance of the installed towers. They conduct regular inspections, perform repairs, and upgrade equipment as needed to maintain optimal signal strength and reliability.

Key Features:

- **Expertise and Experience:** At Net has a team of skilled professionals with extensive knowledge in WiFi network design, installation, tower construction, and maintenance.
- **Quality and Reliability:** The company focuses on delivering high-quality solutions and services, ensuring reliable and consistent At Netivity for their clients.
- **Customized Approach:** At Net understands the unique requirements of each client and provides tailored solutions to meet their specific needs.
- **Timely Execution:** The company emphasizes efficient project management, completing installations and upgrades within agreed timelines.
- **Compliance and Safety:** At Net adheres to industry standards and safety regulations during tower installation, ensuring a safe and compliant infrastructure.

Mission Statement: At Net's mission is to provide businesses, organizations, and communities with seamless and reliable At Netivity through innovative solutions and tower installations. They strive to exceed customer expectations, deliver exceptional service quality, and contribute to the growth and success of their clients.

With their expertise in WiFi solutions and tower installations, At Net is dedicated to bridging the digital divide and enabling businesses and communities to thrive in the connected world.

➤ FTTH

At Net Solutions is a leading provider of Fiber-to-the-Home (FTTH) solutions, dedicated to delivering high-speed, reliable, and future-proof broadband connectivity directly to residential homes and communities. With a focus on innovation, quality, and customer satisfaction, At Net Solutions aims to transform the digital landscape by enabling seamless communication, entertainment, and productivity.

Services:

1. FTTH Network Design and Deployment:

- At Net Solutions specializes in designing and deploying custom FTTH networks tailored to meet the unique requirements of each community. Their services encompass network planning, architecture design, fiber optic cable installation, and the integration of advanced network components.

2. Fiber Optic Cable Installation:

- The company offers expert fiber optic cable installation services, utilizing industry best practices and advanced techniques. Their experienced technicians ensure efficient and reliable installation, including aerial, underground, or hybrid deployment methods, while adhering to safety regulations and minimizing disruptions.

3. Optical Network Terminal (ONT) Installation:

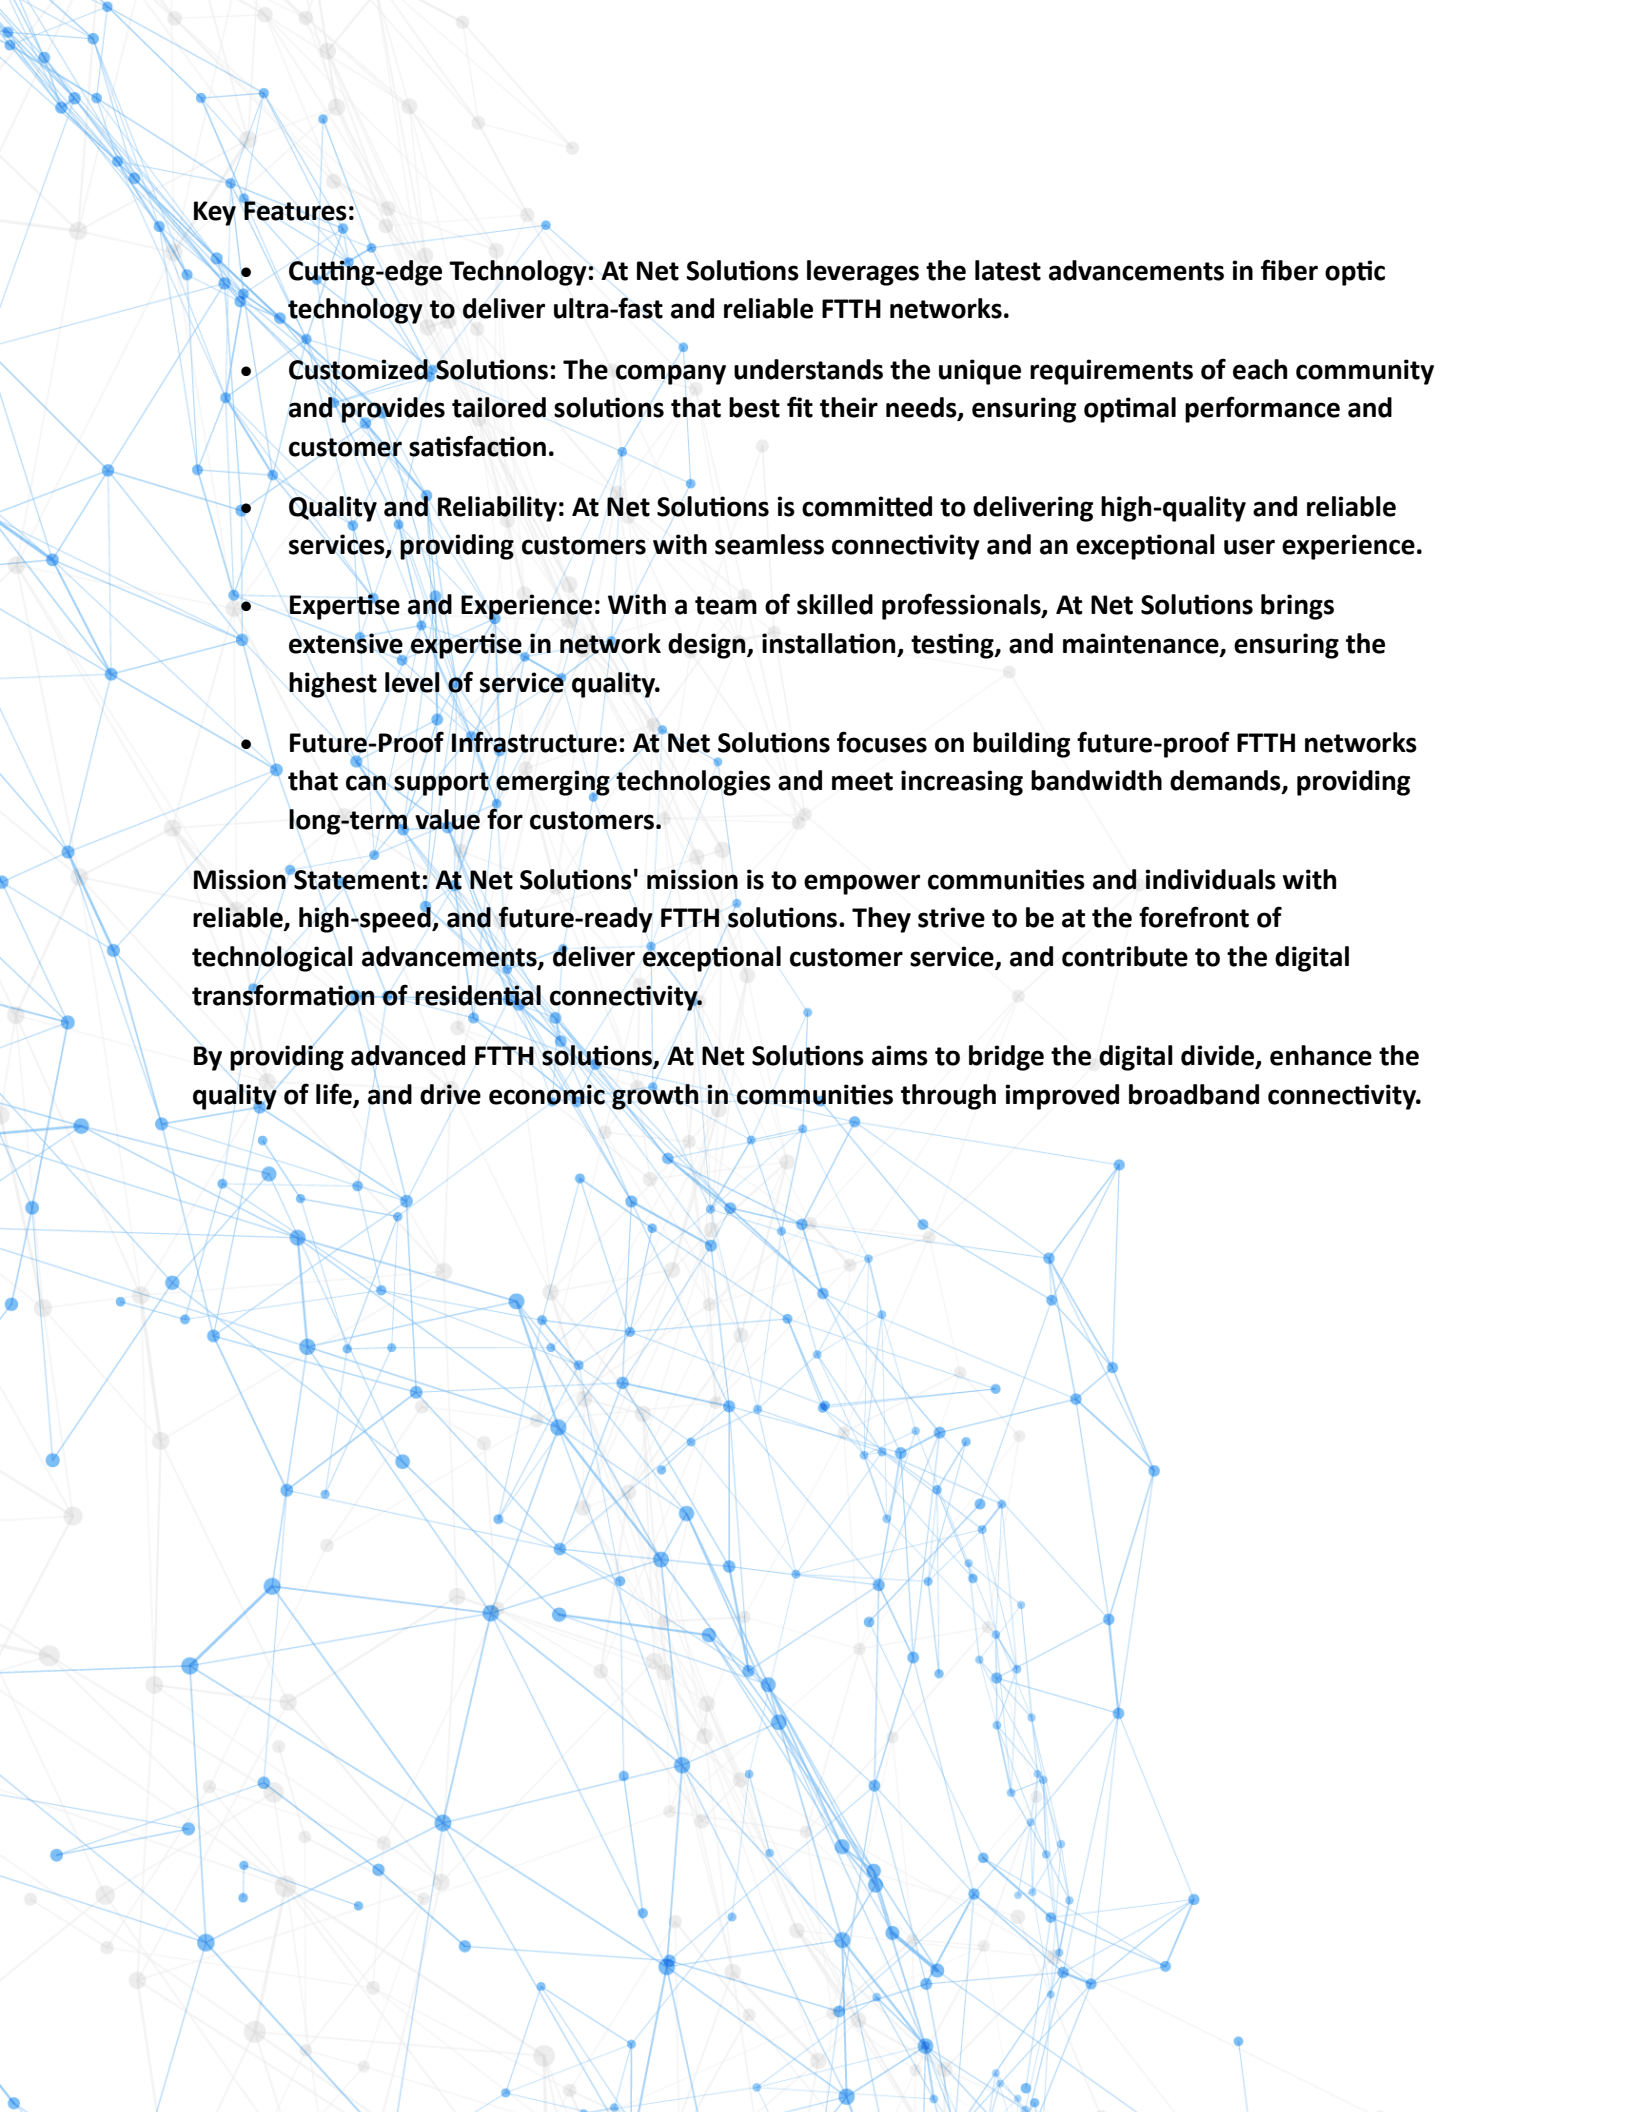

- At Net Solutions handles the installation and configuration of Optical Network Terminals (ONTs) at customer premises. These devices connect the fiber optic network to customers' devices, enabling seamless connectivity and high-speed internet access for multiple devices.

4. Network Testing and Optimization:

- To ensure optimal performance, At Net Solutions conducts thorough testing and optimization of the FTTH networks. They employ advanced testing tools and methodologies to identify and resolve any issues related to signal strength, speed, and reliability, ensuring a robust and stable connection for end-users.

5. Ongoing Maintenance and Support:

- At Net Solutions offers comprehensive maintenance and support services for FTTH networks. Their team provides regular network monitoring, troubleshooting, repairs, and software upgrades to ensure uninterrupted service and customer satisfaction.

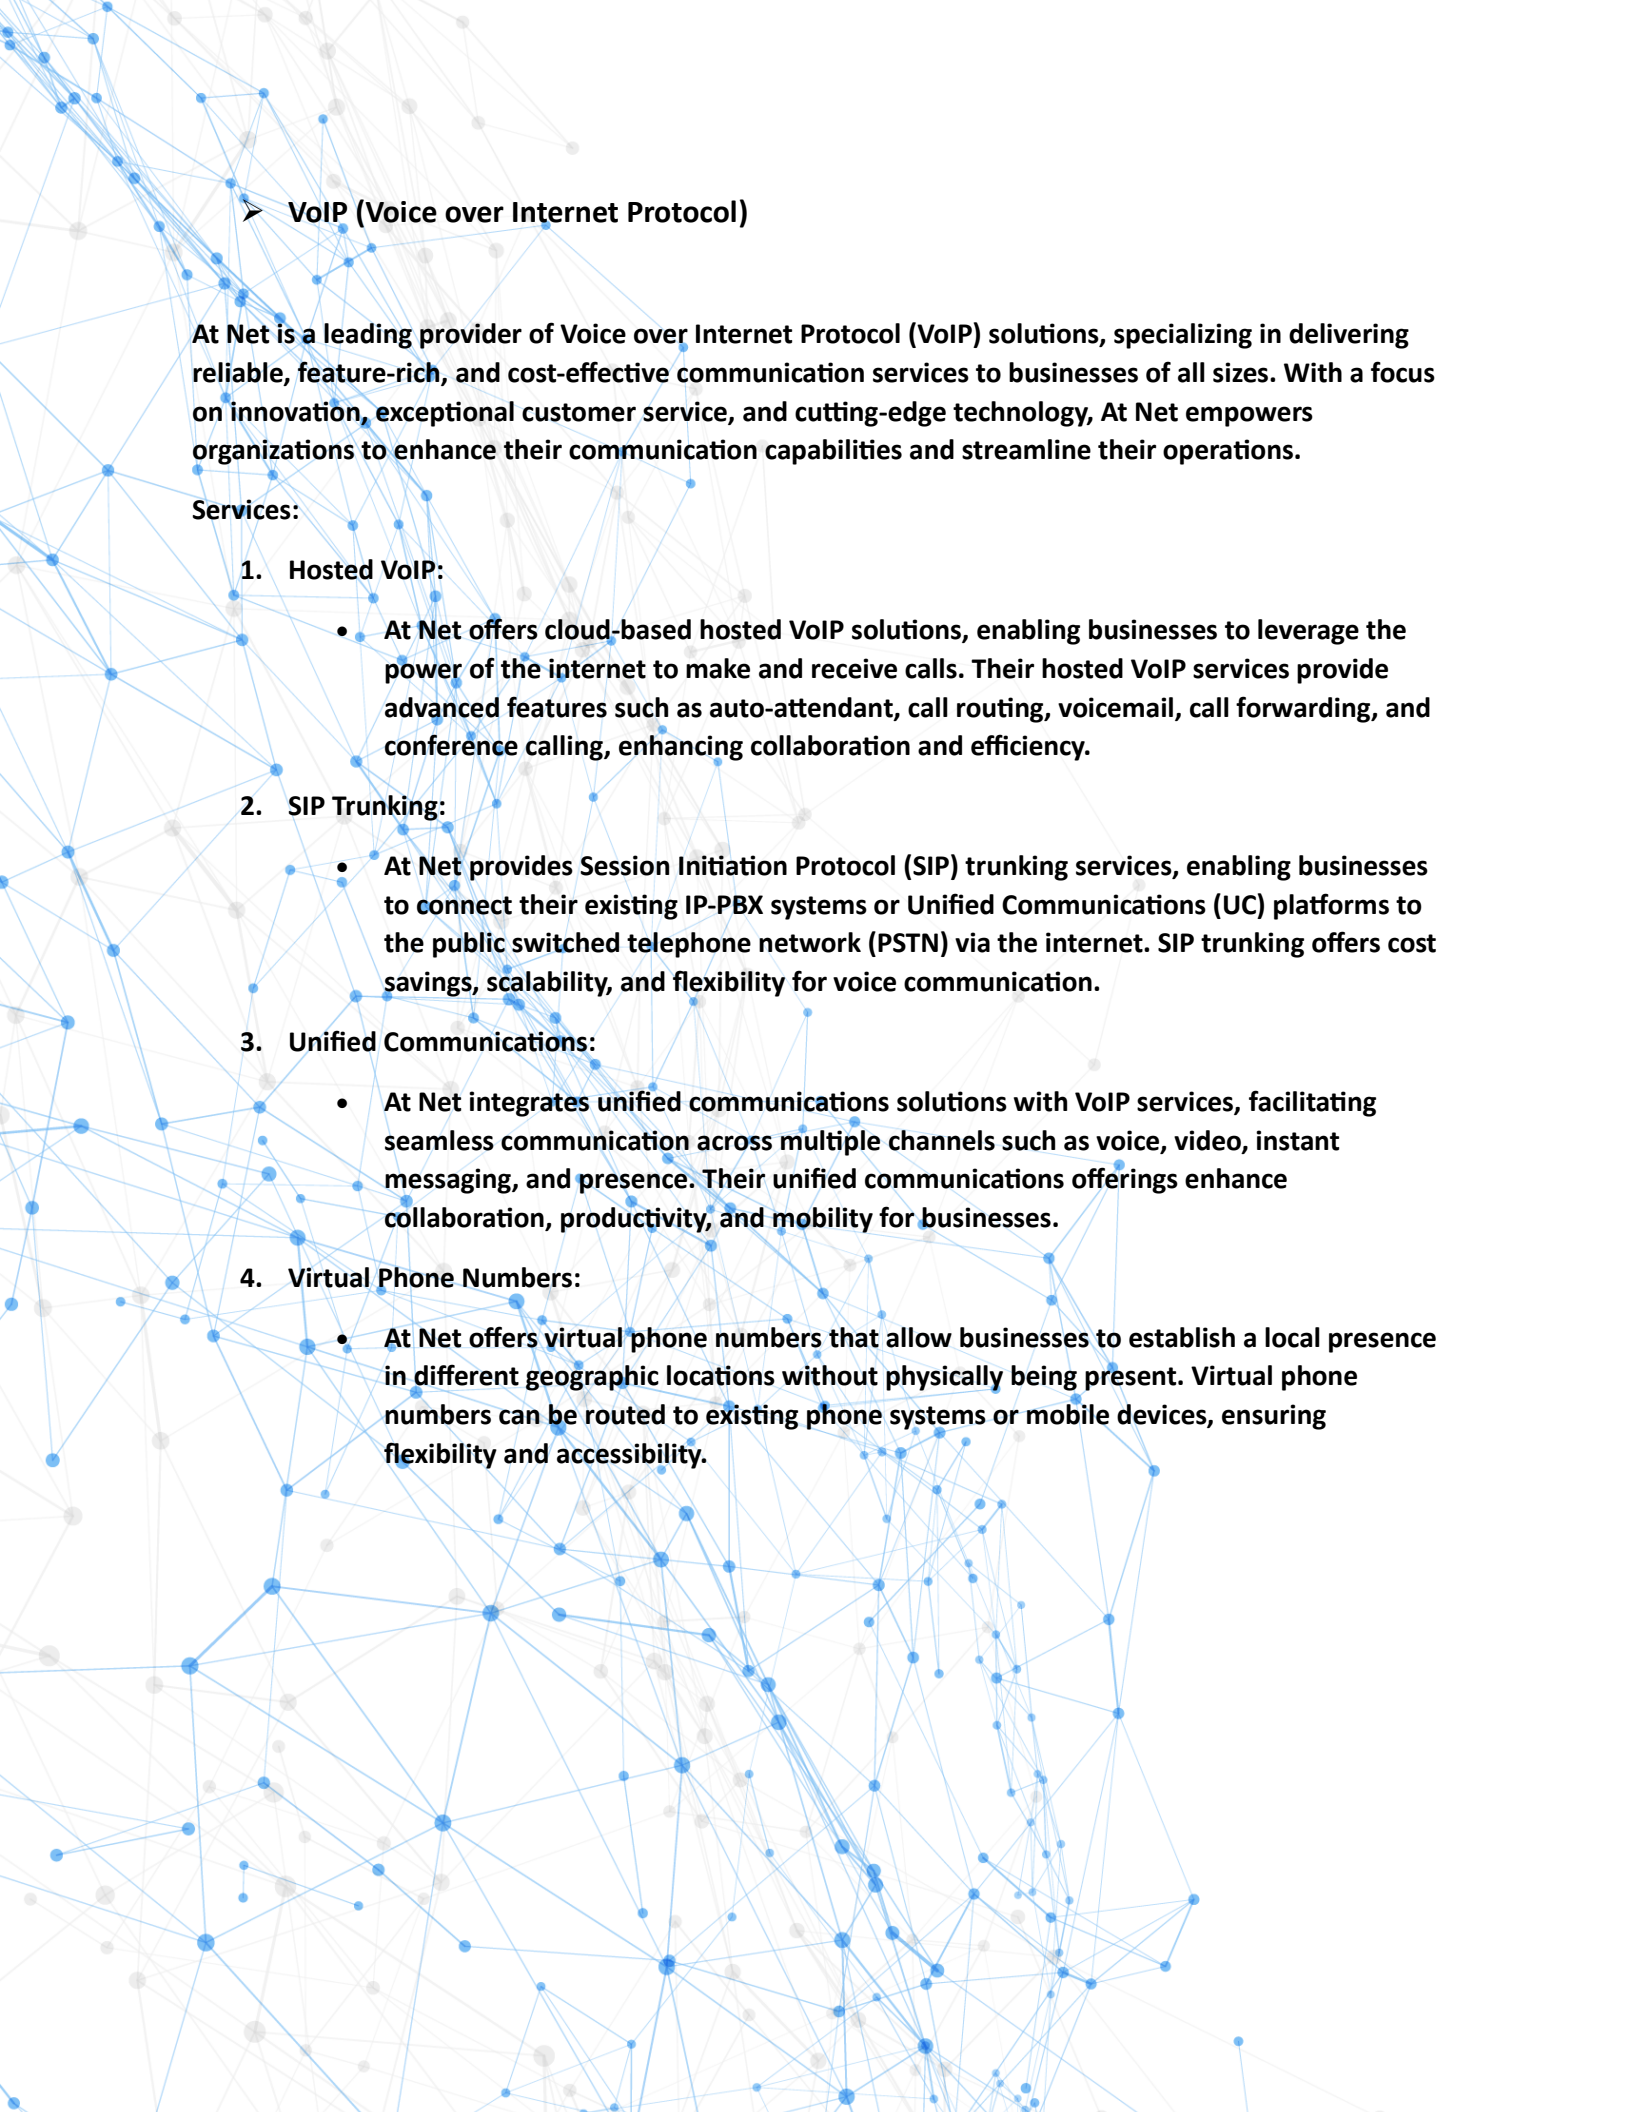

A complex network diagram with numerous blue and grey nodes connected by thin blue lines, forming a web-like structure that fills the background of the page.

Key Features:

- **Cutting-edge Technology:** At Net Solutions leverages the latest advancements in fiber optic technology to deliver ultra-fast and reliable FTTH networks.
- **Customized Solutions:** The company understands the unique requirements of each community and provides tailored solutions that best fit their needs, ensuring optimal performance and customer satisfaction.
- **Quality and Reliability:** At Net Solutions is committed to delivering high-quality and reliable services, providing customers with seamless connectivity and an exceptional user experience.
- **Expertise and Experience:** With a team of skilled professionals, At Net Solutions brings extensive expertise in network design, installation, testing, and maintenance, ensuring the highest level of service quality.
- **Future-Proof Infrastructure:** At Net Solutions focuses on building future-proof FTTH networks that can support emerging technologies and meet increasing bandwidth demands, providing long-term value for customers.

Mission Statement: At Net Solutions' mission is to empower communities and individuals with reliable, high-speed, and future-ready FTTH solutions. They strive to be at the forefront of technological advancements, deliver exceptional customer service, and contribute to the digital transformation of residential connectivity.

By providing advanced FTTH solutions, At Net Solutions aims to bridge the digital divide, enhance the quality of life, and drive economic growth in communities through improved broadband connectivity.

➤ VoIP (Voice over Internet Protocol)

At Net is a leading provider of Voice over Internet Protocol (VoIP) solutions, specializing in delivering reliable, feature-rich, and cost-effective communication services to businesses of all sizes. With a focus on innovation, exceptional customer service, and cutting-edge technology, At Net empowers organizations to enhance their communication capabilities and streamline their operations.

Services:

1. Hosted VoIP:

- At Net offers cloud-based hosted VoIP solutions, enabling businesses to leverage the power of the internet to make and receive calls. Their hosted VoIP services provide advanced features such as auto-attendant, call routing, voicemail, call forwarding, and conference calling, enhancing collaboration and efficiency.

2. SIP Trunking:

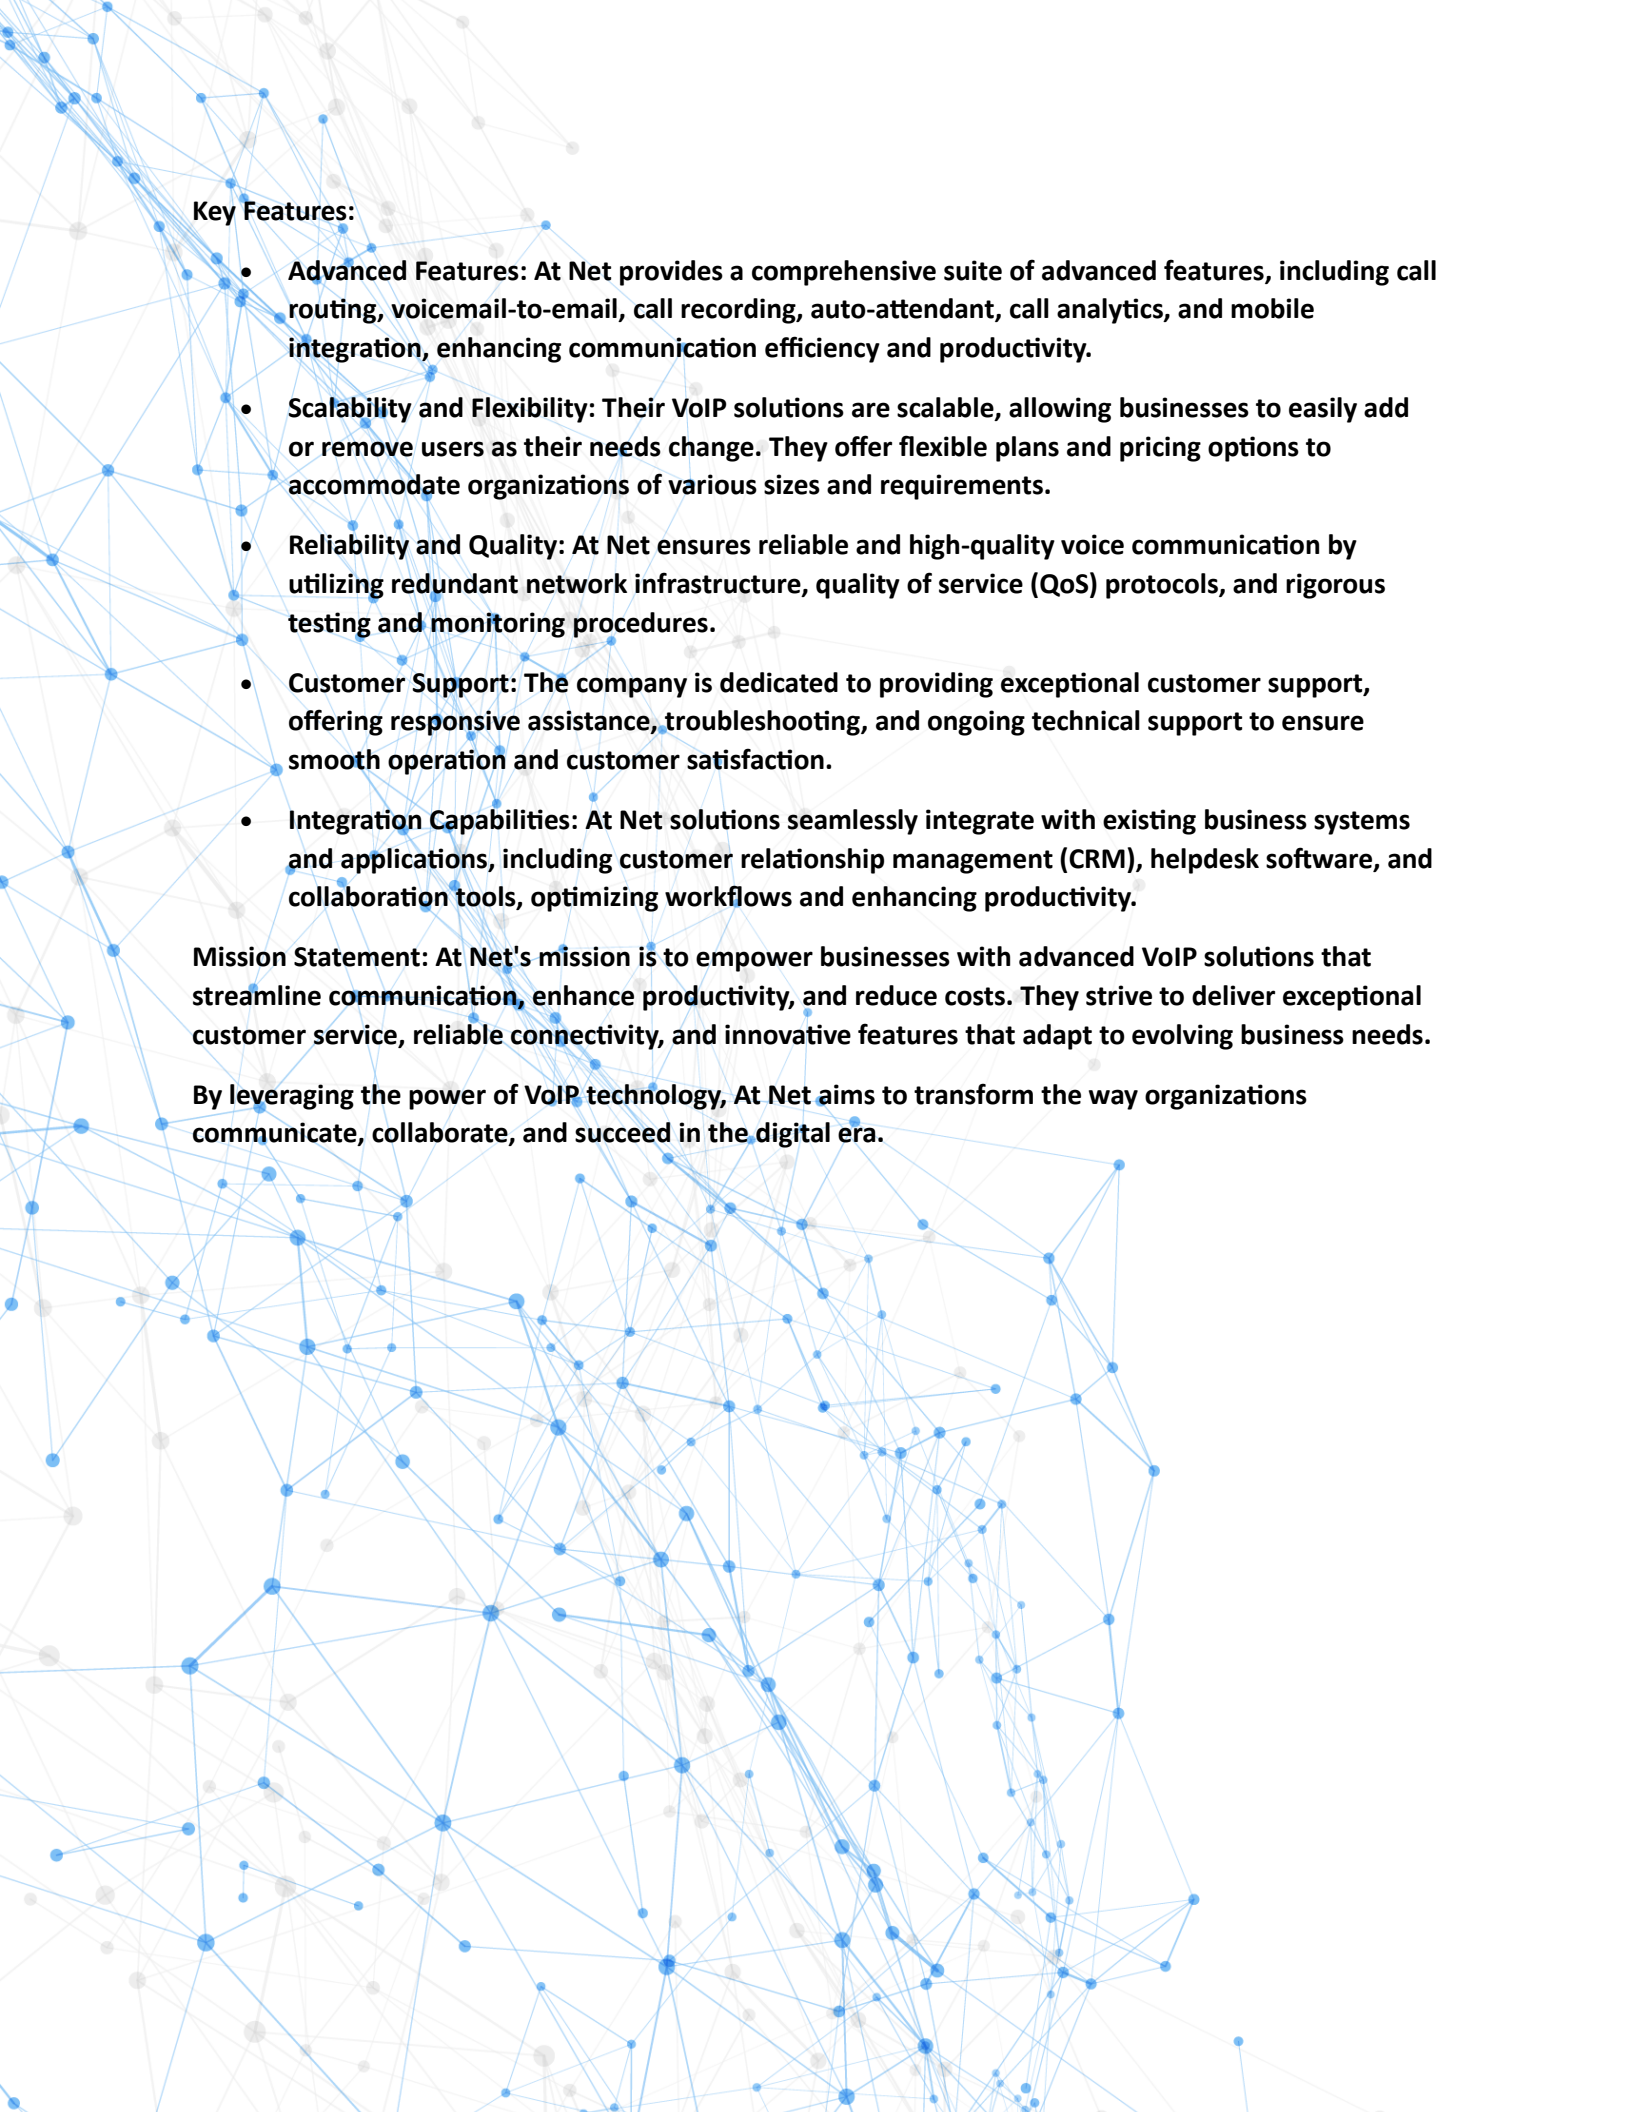

- At Net provides Session Initiation Protocol (SIP) trunking services, enabling businesses to connect their existing IP-PBX systems or Unified Communications (UC) platforms to the public switched telephone network (PSTN) via the internet. SIP trunking offers cost savings, scalability, and flexibility for voice communication.

3. Unified Communications:

- At Net integrates unified communications solutions with VoIP services, facilitating seamless communication across multiple channels such as voice, video, instant messaging, and presence. Their unified communications offerings enhance collaboration, productivity, and mobility for businesses.

4. Virtual Phone Numbers:

- At Net offers virtual phone numbers that allow businesses to establish a local presence in different geographic locations without physically being present. Virtual phone numbers can be routed to existing phone systems or mobile devices, ensuring flexibility and accessibility.

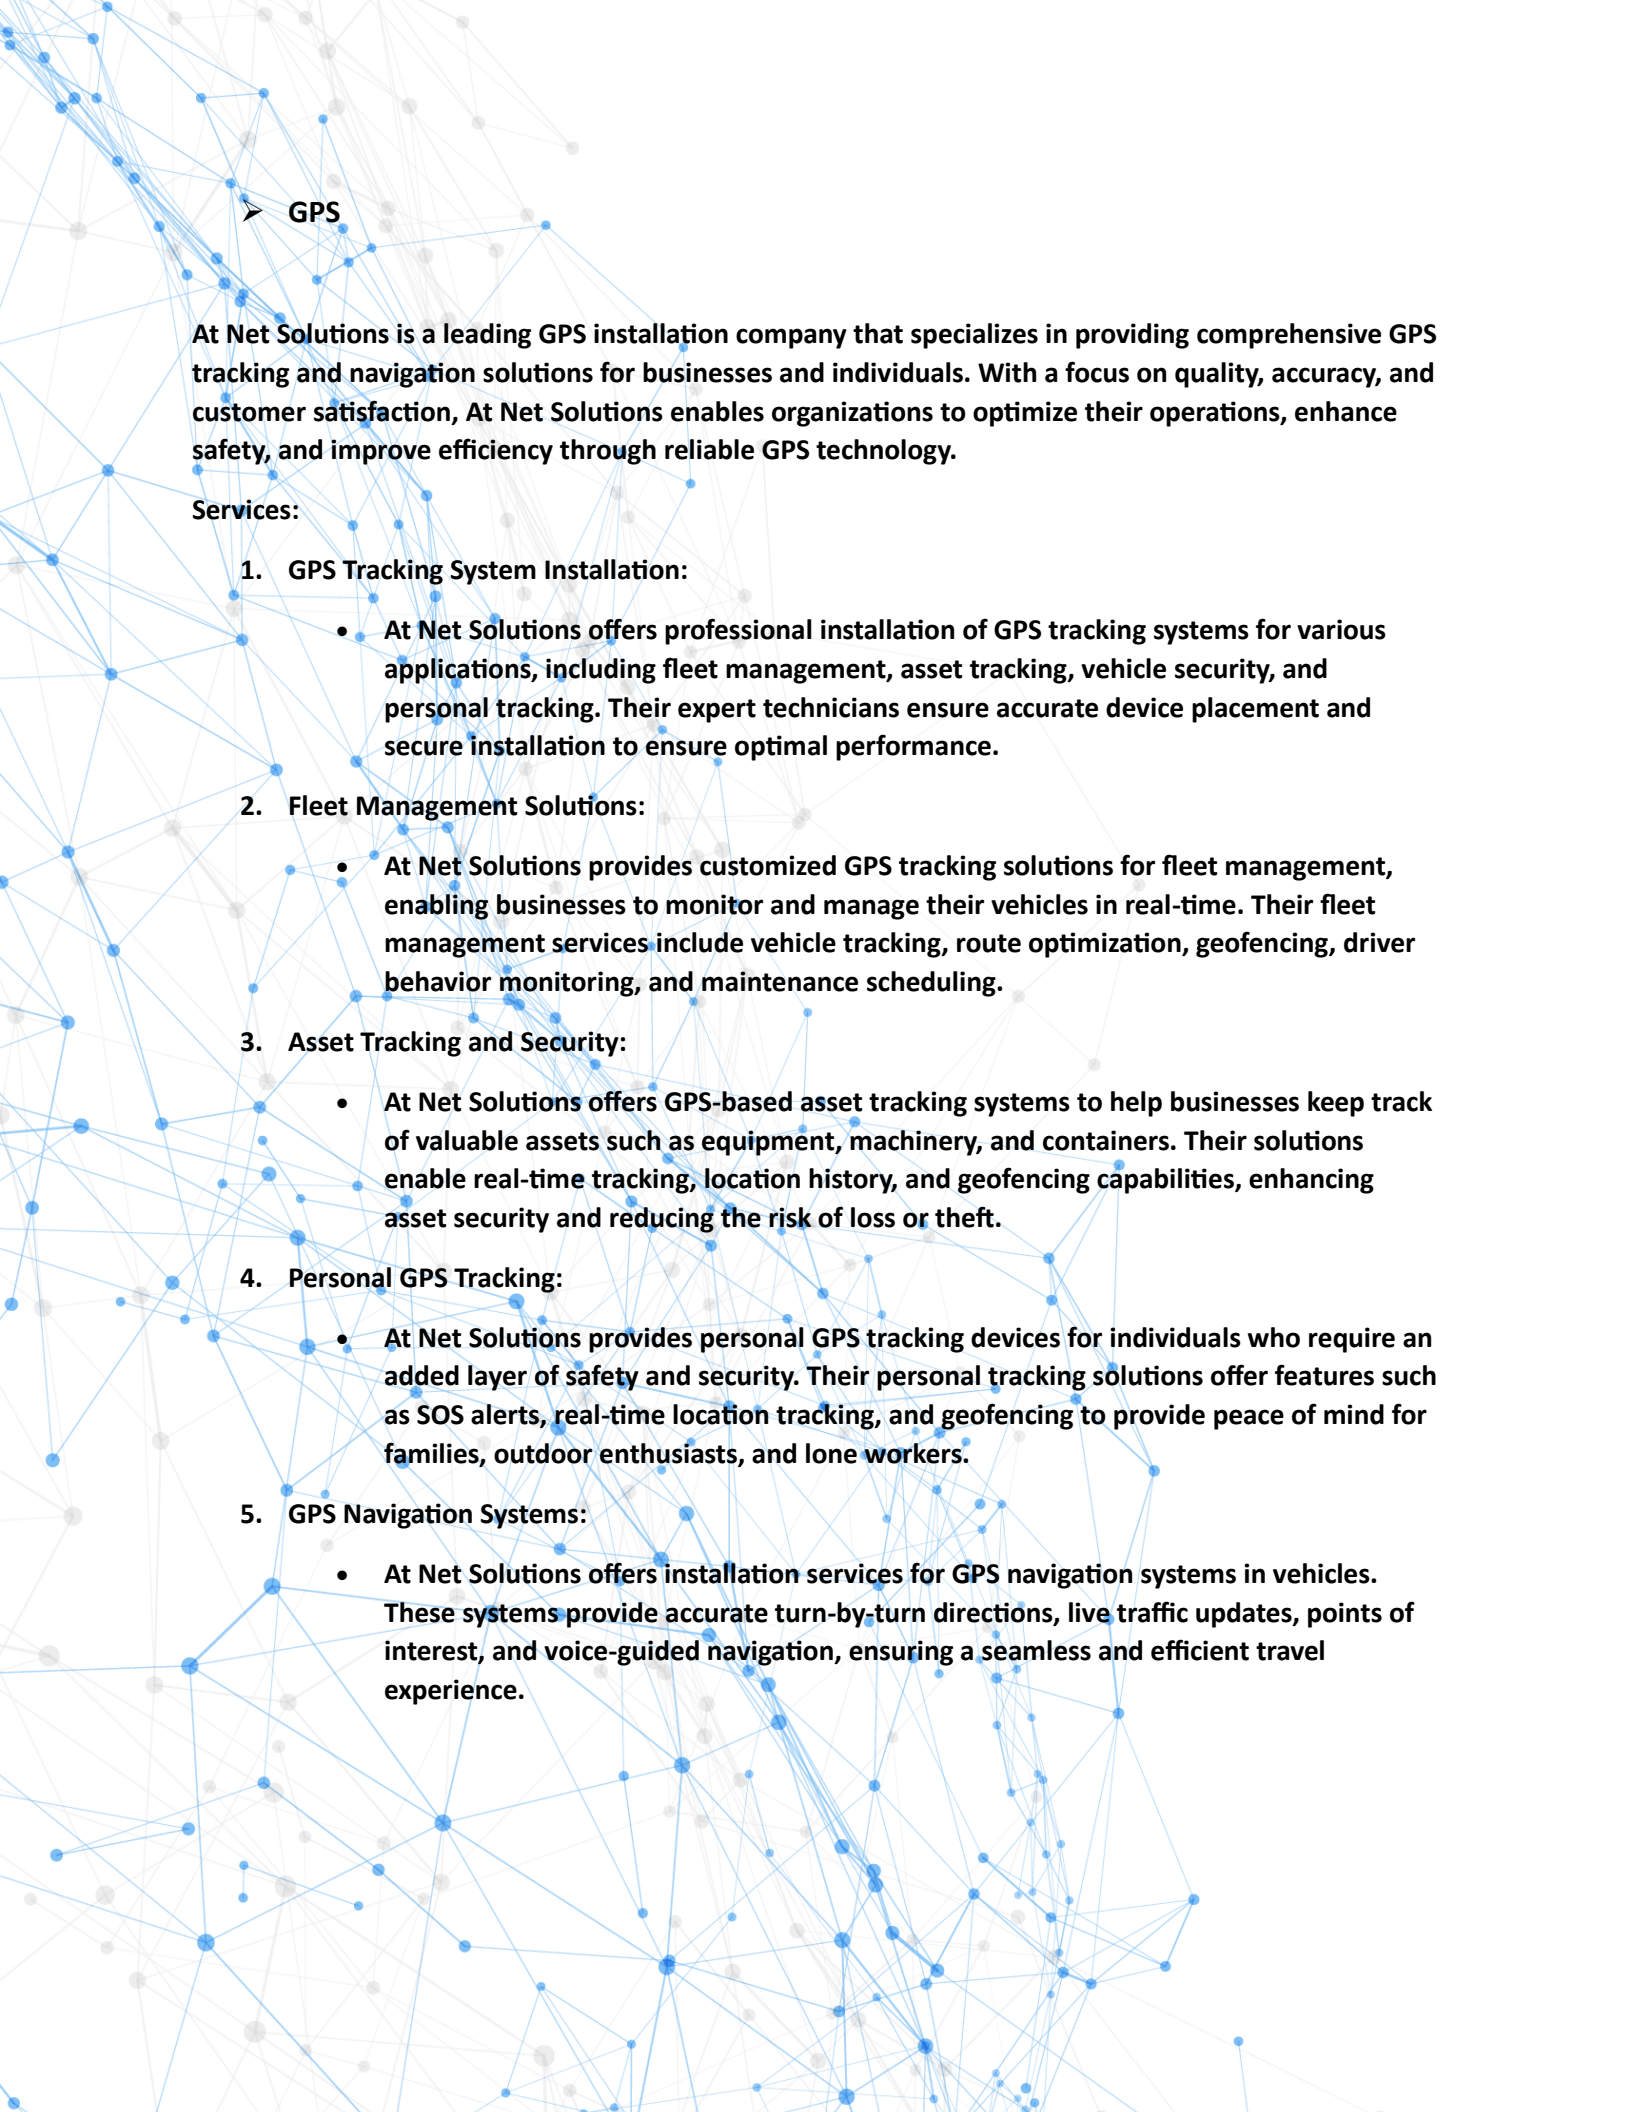

Key Features:

- **Advanced Features:** At Net provides a comprehensive suite of advanced features, including call routing, voicemail-to-email, call recording, auto-attendant, call analytics, and mobile integration, enhancing communication efficiency and productivity.
- **Scalability and Flexibility:** Their VoIP solutions are scalable, allowing businesses to easily add or remove users as their needs change. They offer flexible plans and pricing options to accommodate organizations of various sizes and requirements.
- **Reliability and Quality:** At Net ensures reliable and high-quality voice communication by utilizing redundant network infrastructure, quality of service (QoS) protocols, and rigorous testing and monitoring procedures.
- **Customer Support:** The company is dedicated to providing exceptional customer support, offering responsive assistance, troubleshooting, and ongoing technical support to ensure smooth operation and customer satisfaction.
- **Integration Capabilities:** At Net solutions seamlessly integrate with existing business systems and applications, including customer relationship management (CRM), helpdesk software, and collaboration tools, optimizing workflows and enhancing productivity.

Mission Statement: At Net's mission is to empower businesses with advanced VoIP solutions that streamline communication, enhance productivity, and reduce costs. They strive to deliver exceptional customer service, reliable connectivity, and innovative features that adapt to evolving business needs.

By leveraging the power of VoIP technology, At Net aims to transform the way organizations communicate, collaborate, and succeed in the digital era.

➤ GPS

At Net Solutions is a leading GPS installation company that specializes in providing comprehensive GPS tracking and navigation solutions for businesses and individuals. With a focus on quality, accuracy, and customer satisfaction, At Net Solutions enables organizations to optimize their operations, enhance safety, and improve efficiency through reliable GPS technology.

Services:

1. GPS Tracking System Installation:

- At Net Solutions offers professional installation of GPS tracking systems for various applications, including fleet management, asset tracking, vehicle security, and personal tracking. Their expert technicians ensure accurate device placement and secure installation to ensure optimal performance.

2. Fleet Management Solutions:

- At Net Solutions provides customized GPS tracking solutions for fleet management, enabling businesses to monitor and manage their vehicles in real-time. Their fleet management services include vehicle tracking, route optimization, geofencing, driver behavior monitoring, and maintenance scheduling.

3. Asset Tracking and Security:

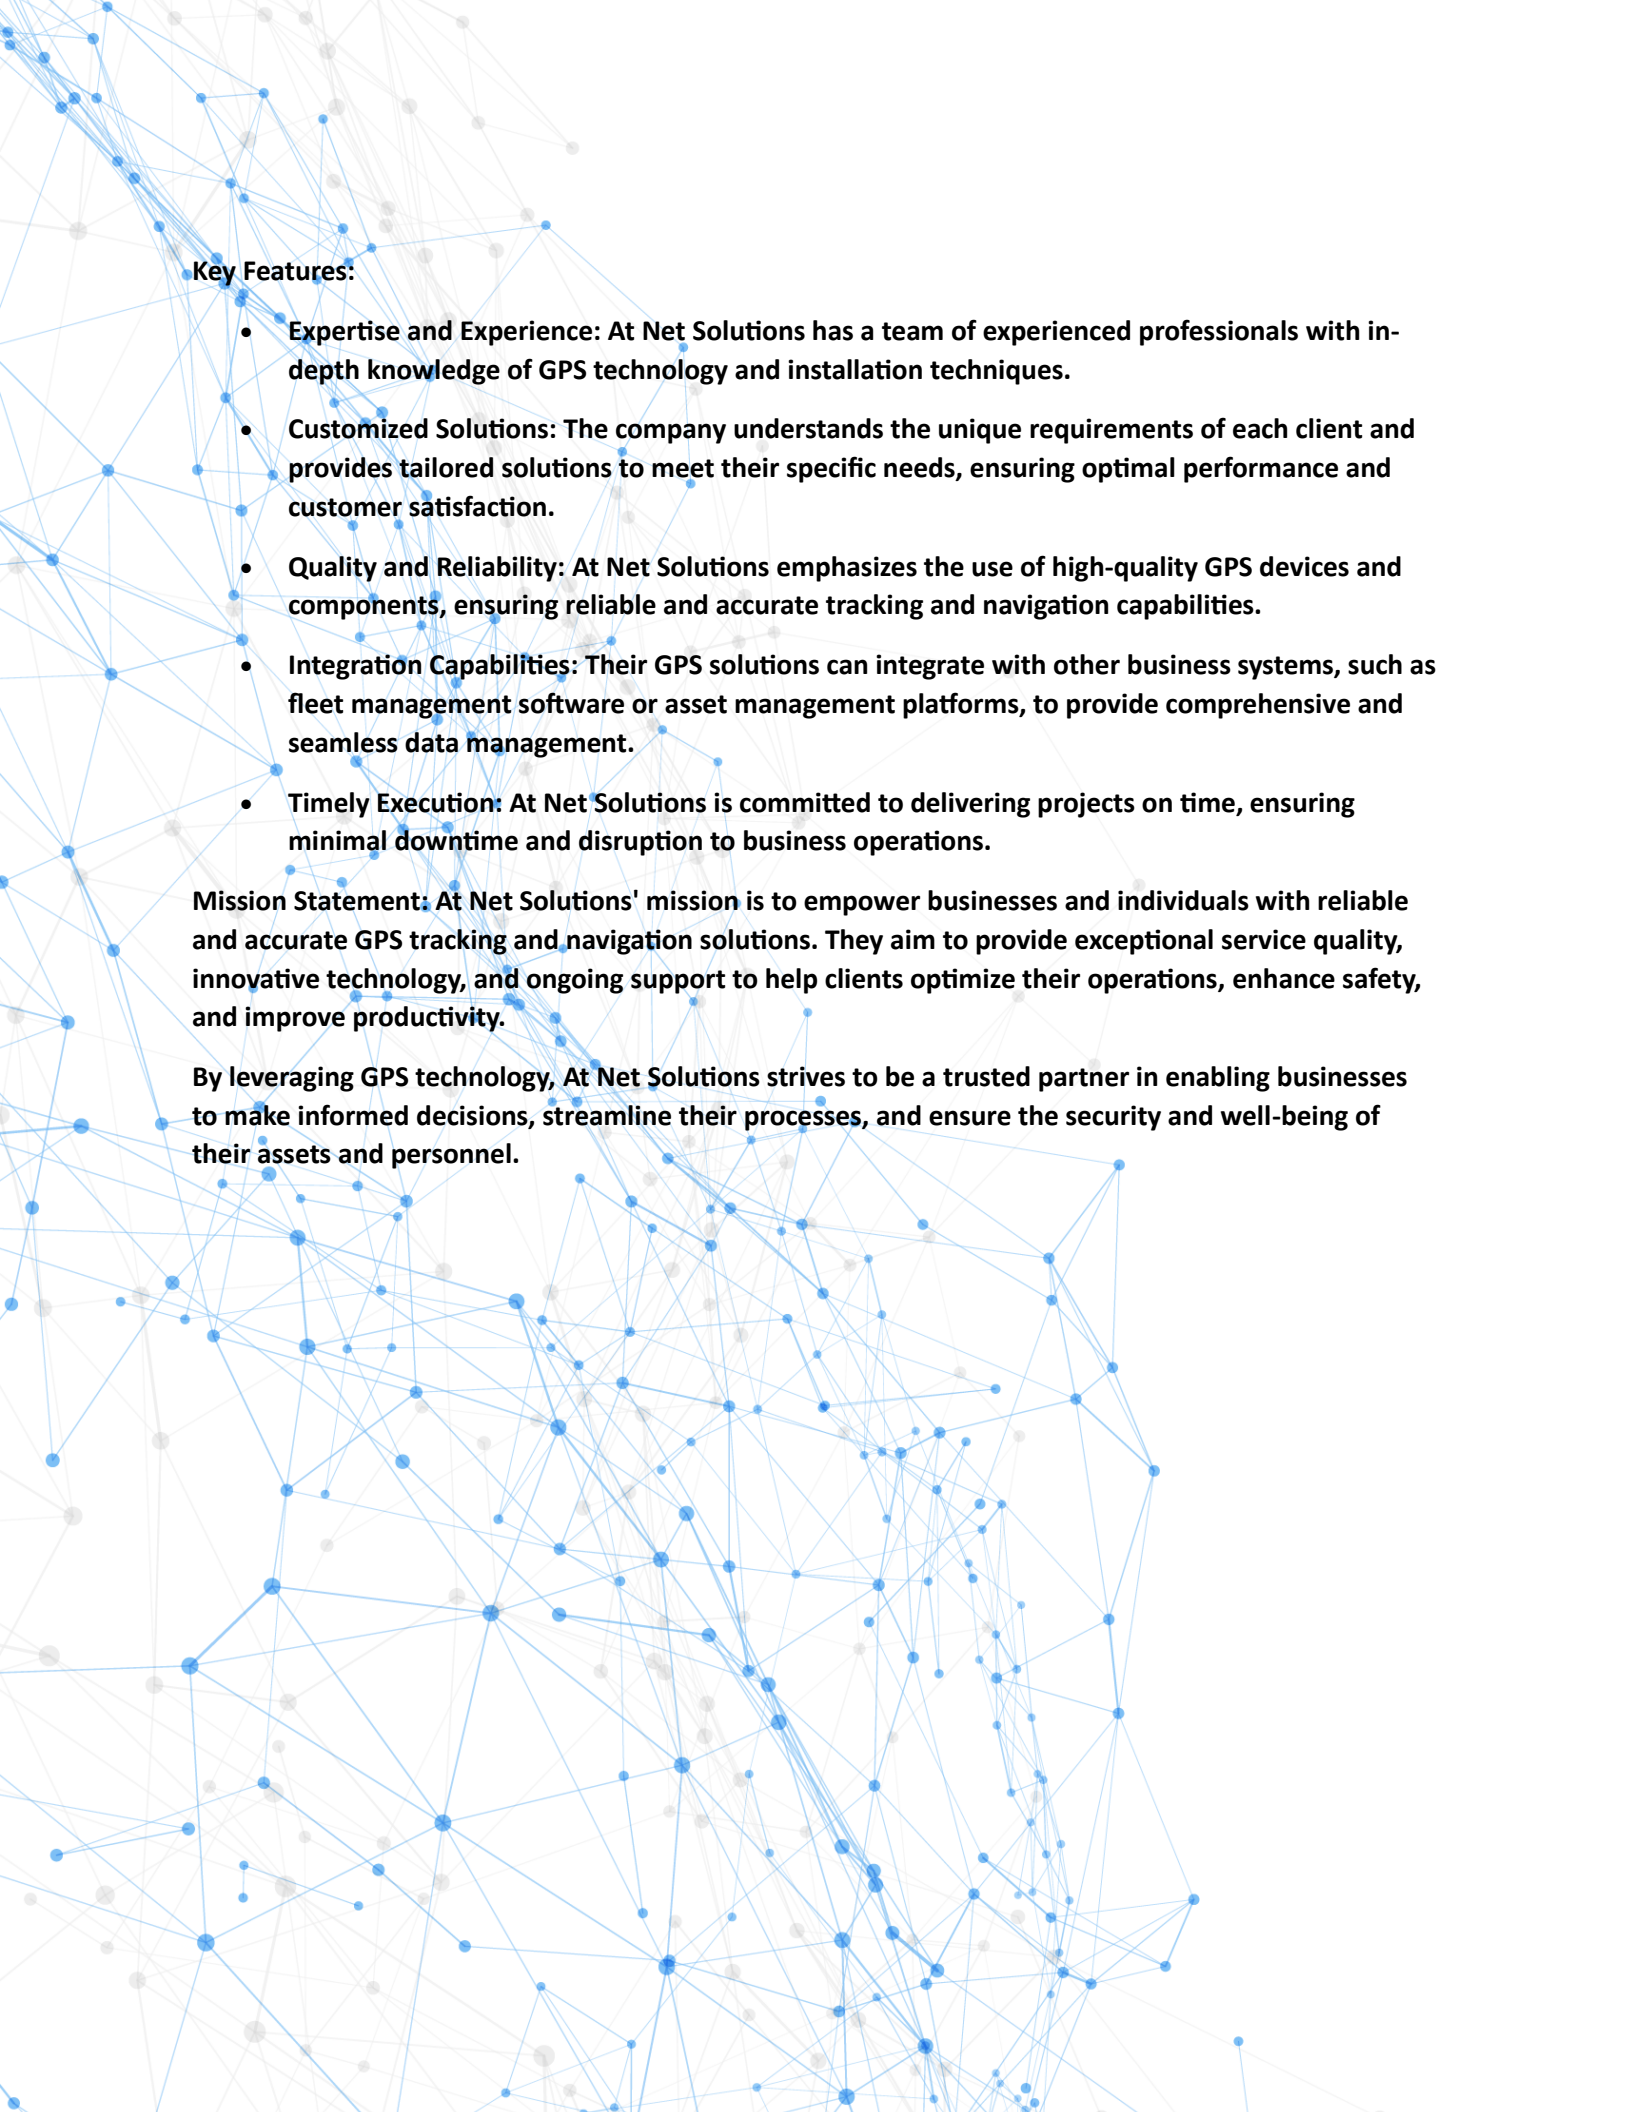

- At Net Solutions offers GPS-based asset tracking systems to help businesses keep track of valuable assets such as equipment, machinery, and containers. Their solutions enable real-time tracking, location history, and geofencing capabilities, enhancing asset security and reducing the risk of loss or theft.

4. Personal GPS Tracking:

- At Net Solutions provides personal GPS tracking devices for individuals who require an added layer of safety and security. Their personal tracking solutions offer features such as SOS alerts, real-time location tracking, and geofencing to provide peace of mind for families, outdoor enthusiasts, and lone workers.

5. GPS Navigation Systems:

- At Net Solutions offers installation services for GPS navigation systems in vehicles. These systems provide accurate turn-by-turn directions, live traffic updates, points of interest, and voice-guided navigation, ensuring a seamless and efficient travel experience.

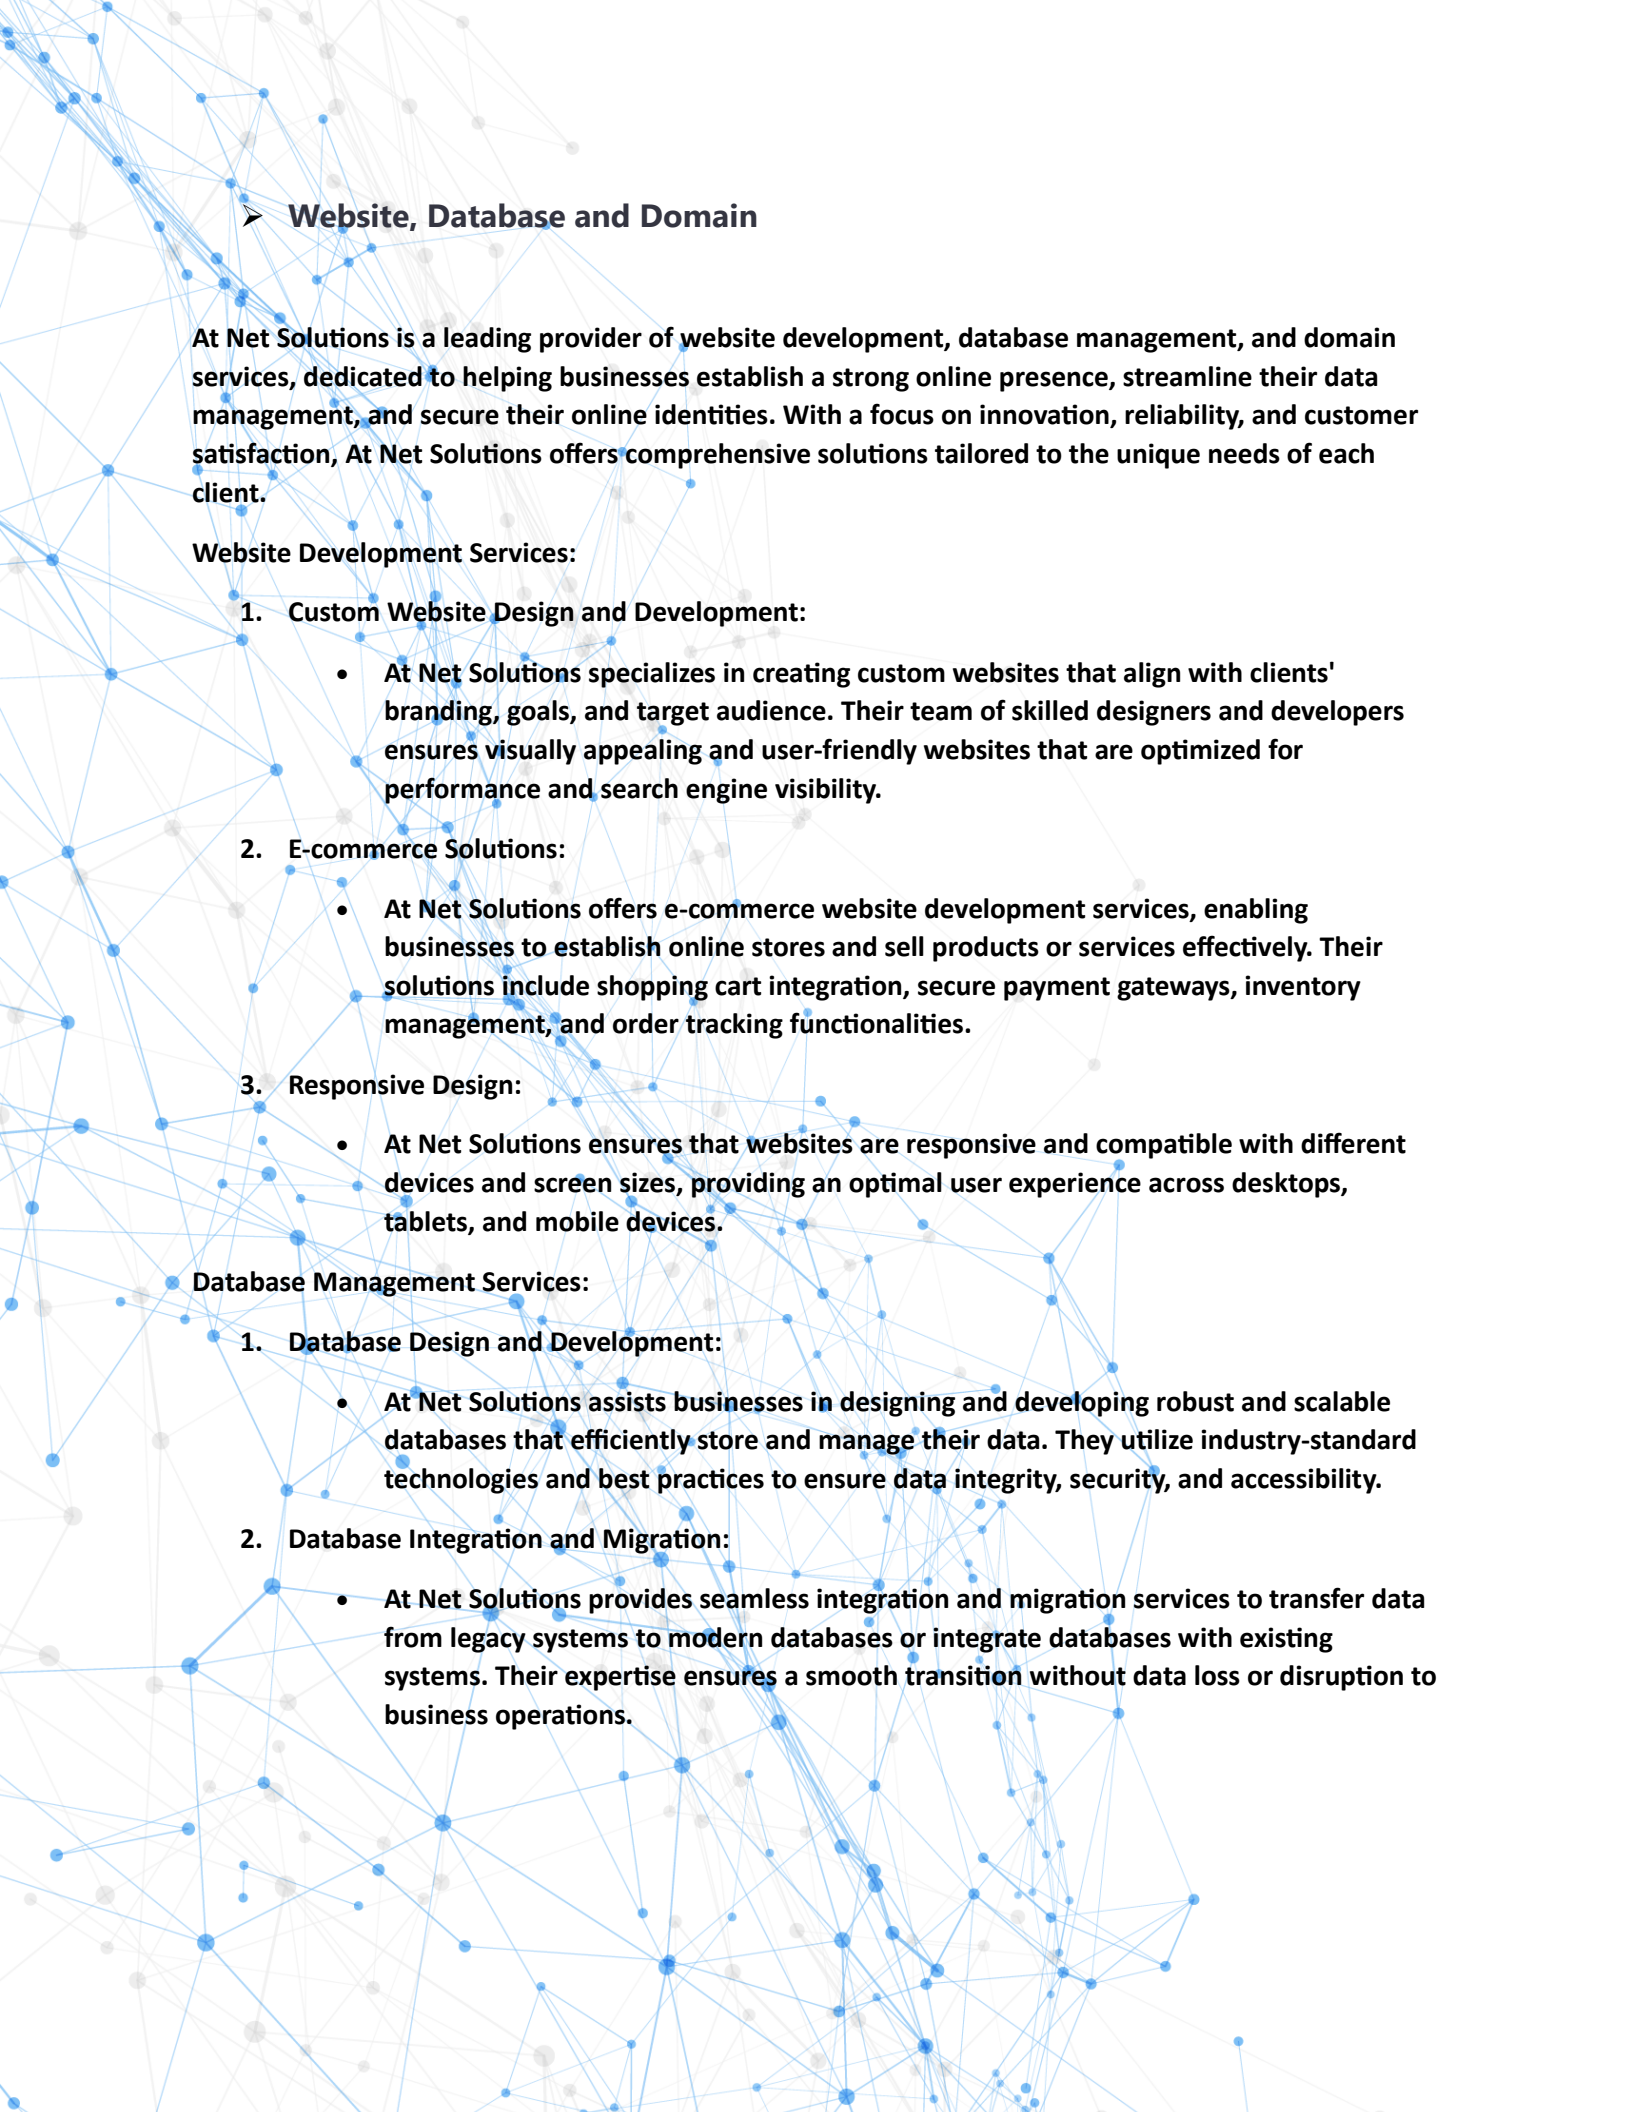

A complex network of blue and grey dots connected by thin lines, forming a web-like pattern that serves as a background for the text.

Key Features:

- **Expertise and Experience:** At Net Solutions has a team of experienced professionals with in-depth knowledge of GPS technology and installation techniques.
- **Customized Solutions:** The company understands the unique requirements of each client and provides tailored solutions to meet their specific needs, ensuring optimal performance and customer satisfaction.
- **Quality and Reliability:** At Net Solutions emphasizes the use of high-quality GPS devices and components, ensuring reliable and accurate tracking and navigation capabilities.
- **Integration Capabilities:** Their GPS solutions can integrate with other business systems, such as fleet management software or asset management platforms, to provide comprehensive and seamless data management.
- **Timely Execution:** At Net Solutions is committed to delivering projects on time, ensuring minimal downtime and disruption to business operations.

Mission Statement: At Net Solutions' mission is to empower businesses and individuals with reliable and accurate GPS tracking and navigation solutions. They aim to provide exceptional service quality, innovative technology, and ongoing support to help clients optimize their operations, enhance safety, and improve productivity.

By leveraging GPS technology, At Net Solutions strives to be a trusted partner in enabling businesses to make informed decisions, streamline their processes, and ensure the security and well-being of their assets and personnel.

➤ Website, Database and Domain

At Net Solutions is a leading provider of website development, database management, and domain services, dedicated to helping businesses establish a strong online presence, streamline their data management, and secure their online identities. With a focus on innovation, reliability, and customer satisfaction, At Net Solutions offers comprehensive solutions tailored to the unique needs of each client.

Website Development Services:

1. Custom Website Design and Development:

- At Net Solutions specializes in creating custom websites that align with clients' branding, goals, and target audience. Their team of skilled designers and developers ensures visually appealing and user-friendly websites that are optimized for performance and search engine visibility.

2. E-commerce Solutions:

- At Net Solutions offers e-commerce website development services, enabling businesses to establish online stores and sell products or services effectively. Their solutions include shopping cart integration, secure payment gateways, inventory management, and order tracking functionalities.

3. Responsive Design:

- At Net Solutions ensures that websites are responsive and compatible with different devices and screen sizes, providing an optimal user experience across desktops, tablets, and mobile devices.

Database Management Services:

1. Database Design and Development:

- At Net Solutions assists businesses in designing and developing robust and scalable databases that efficiently store and manage their data. They utilize industry-standard technologies and best practices to ensure data integrity, security, and accessibility.

2. Database Integration and Migration:

- At Net Solutions provides seamless integration and migration services to transfer data from legacy systems to modern databases or integrate databases with existing systems. Their expertise ensures a smooth transition without data loss or disruption to business operations.

3. Database Optimization and Performance Tuning:

- At Net Solutions optimizes databases to enhance performance, improve query execution times, and minimize downtime. Their database experts analyze and fine-tune database configurations, indexes, and queries to maximize efficiency and response times.

Domain Services:

1. Domain Name Registration and Management:

- At Net Solutions offers domain name registration services, helping businesses secure their online identities with relevant and memorable domain names. They also provide domain management services, including DNS management and domain renewal assistance.

2. Domain Transfer and Consolidation:

- At Net Solutions assists clients in transferring domains from one registrar to another or consolidating multiple domains under a single management platform. Their streamlined processes ensure a smooth and hassle-free domain transfer experience.

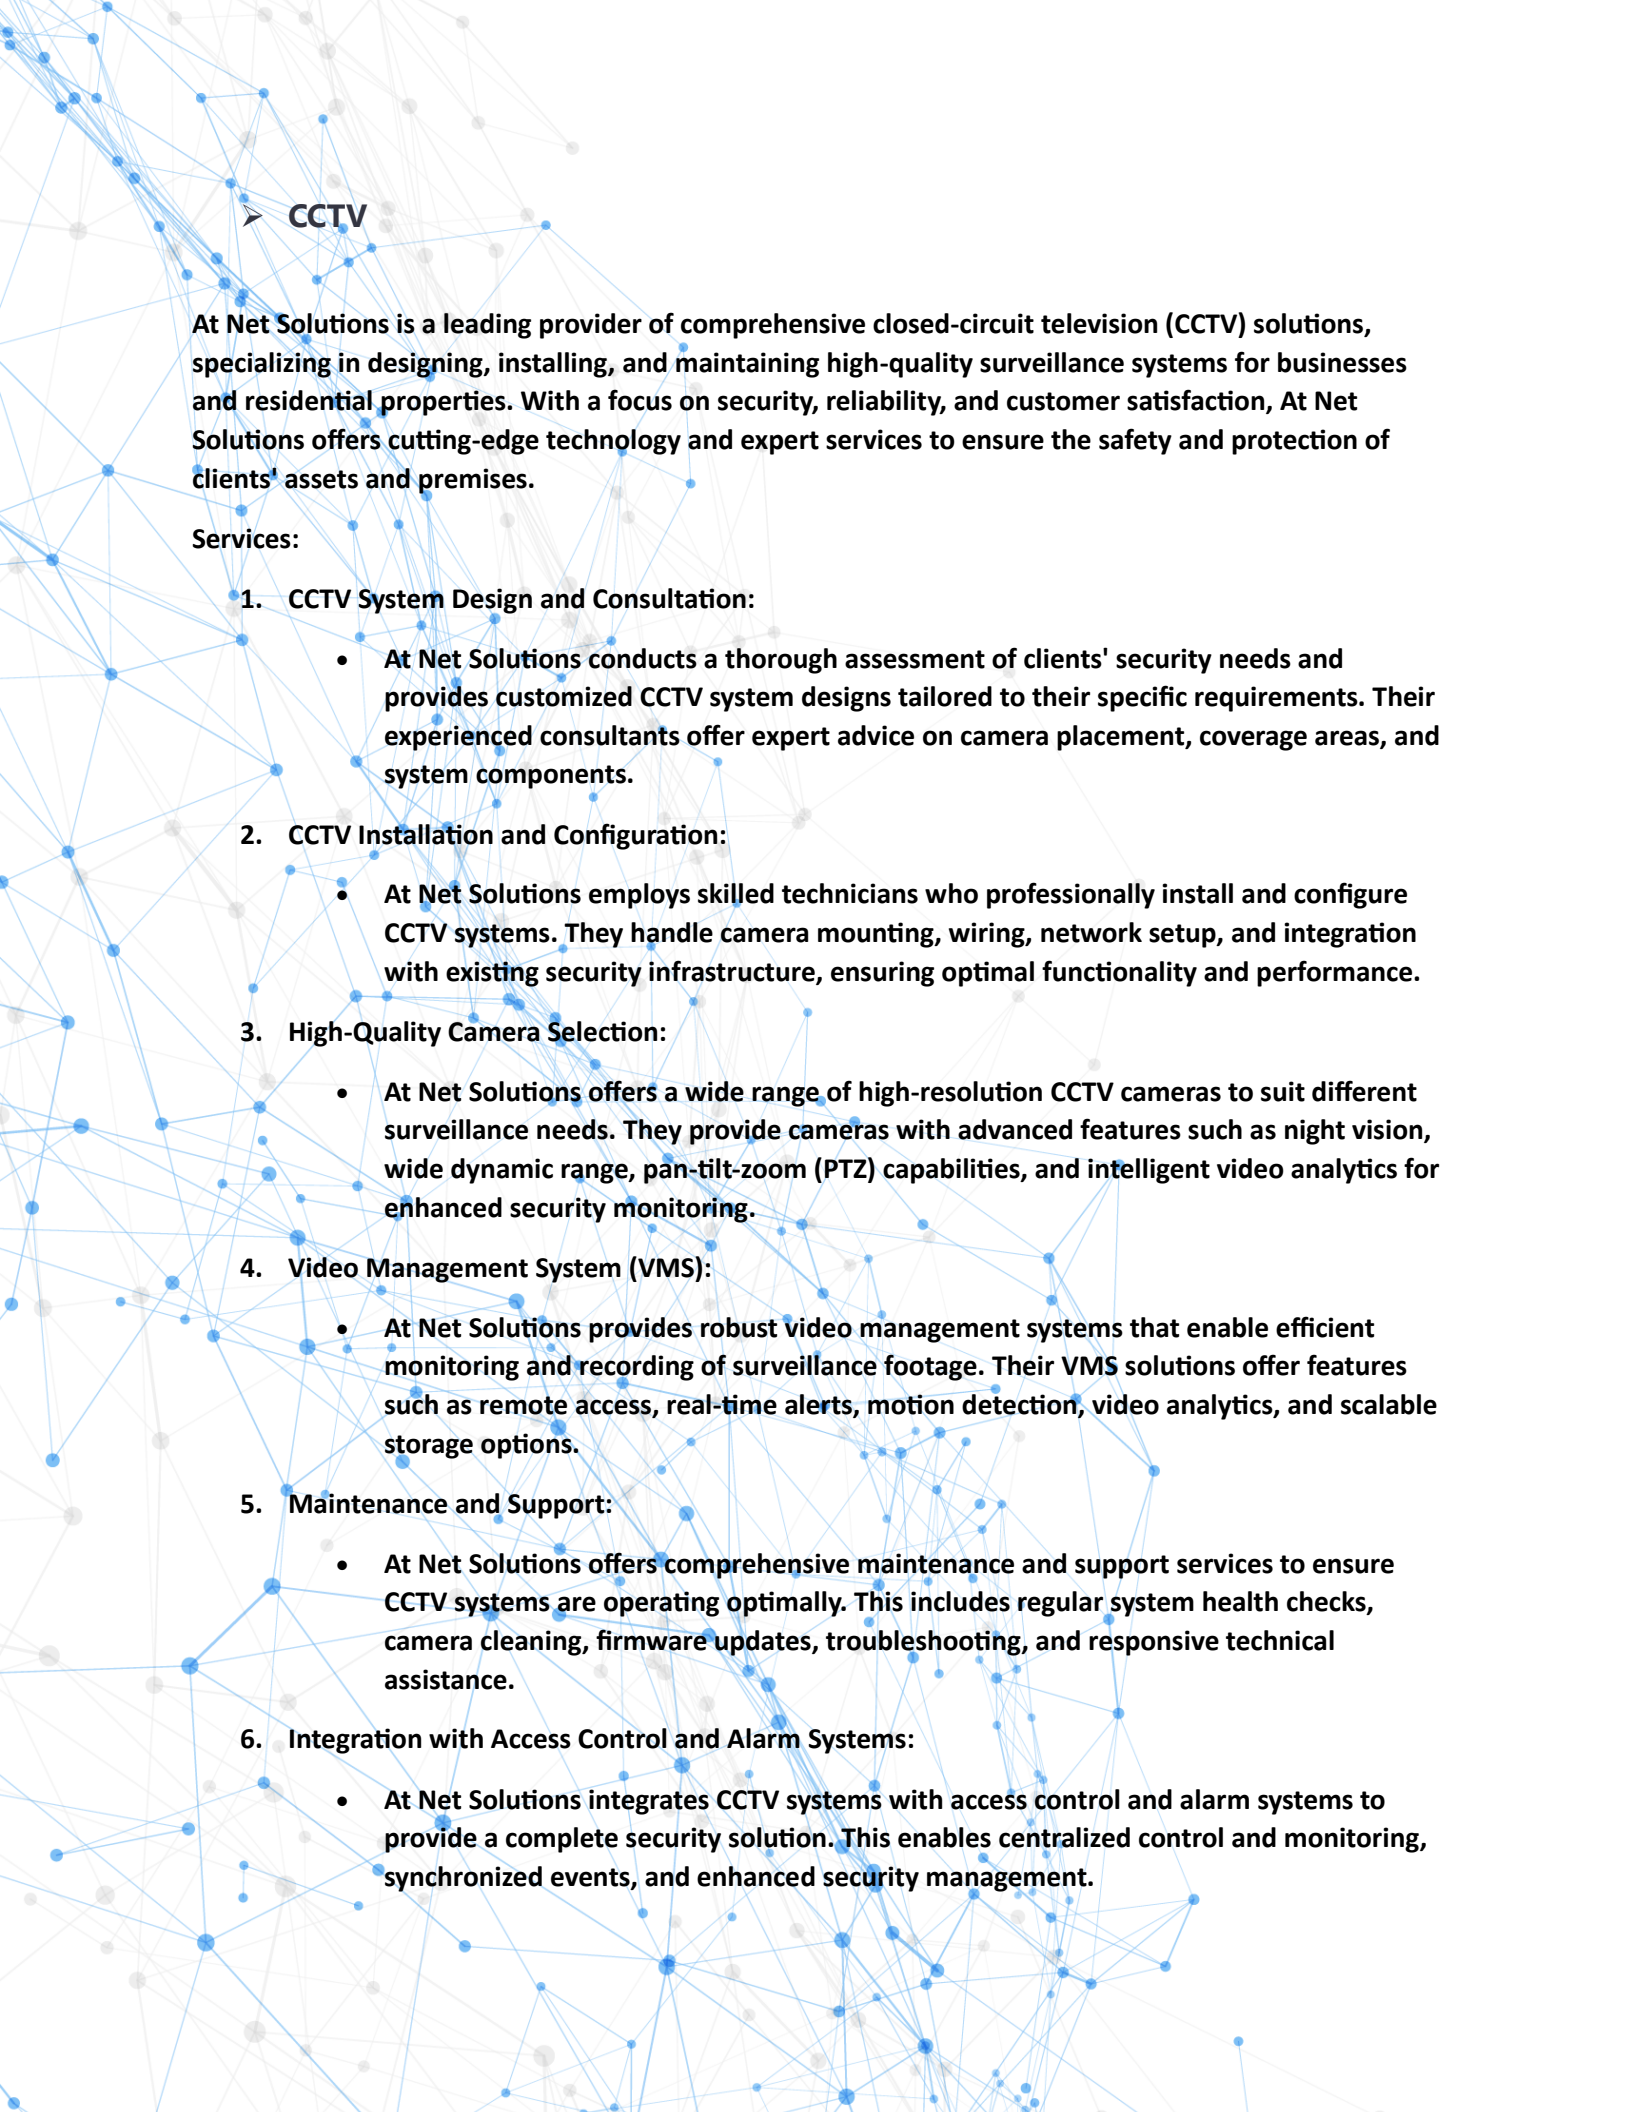

3. Domain Privacy and Security:

- At Net Solutions helps protect clients' privacy and enhance domain security by offering domain privacy services, preventing personal information from being publicly accessible, and implementing security measures to safeguard against unauthorized domain transfers or modifications.

Key Features:

- **Expertise and Experience:** At Net Solutions boasts a team of skilled professionals with extensive knowledge in website development, database management, and domain services.
- **Customization and Innovation:** The company provides tailored solutions, embracing the latest technologies and trends to deliver innovative and cutting-edge services.
- **Quality and Reliability:** At Net Solutions emphasizes delivering high-quality solutions and reliable services, ensuring client satisfaction and long-term success.
- **Customer Support:** The company is committed to providing exceptional customer support, offering prompt assistance, technical guidance, and ongoing maintenance to address clients' needs.
- **Competitive Pricing:** At Net Solutions offers competitive pricing models and transparent cost structures, ensuring affordability without compromising service quality.

Mission Statement: At Net Solutions' mission is to empower businesses with robust websites, efficient database management, and secure online identities. They aim to deliver exceptional service quality, innovative solutions, and personalized support to help clients succeed in the digital landscape.

➤ CCTV

At Net Solutions is a leading provider of comprehensive closed-circuit television (CCTV) solutions, specializing in designing, installing, and maintaining high-quality surveillance systems for businesses and residential properties. With a focus on security, reliability, and customer satisfaction, At Net Solutions offers cutting-edge technology and expert services to ensure the safety and protection of clients' assets and premises.

Services:

1. CCTV System Design and Consultation:

- At Net Solutions conducts a thorough assessment of clients' security needs and provides customized CCTV system designs tailored to their specific requirements. Their experienced consultants offer expert advice on camera placement, coverage areas, and system components.

2. CCTV Installation and Configuration:

- At Net Solutions employs skilled technicians who professionally install and configure CCTV systems. They handle camera mounting, wiring, network setup, and integration with existing security infrastructure, ensuring optimal functionality and performance.

3. High-Quality Camera Selection:

- At Net Solutions offers a wide range of high-resolution CCTV cameras to suit different surveillance needs. They provide cameras with advanced features such as night vision, wide dynamic range, pan-tilt-zoom (PTZ) capabilities, and intelligent video analytics for enhanced security monitoring.

4. Video Management System (VMS):

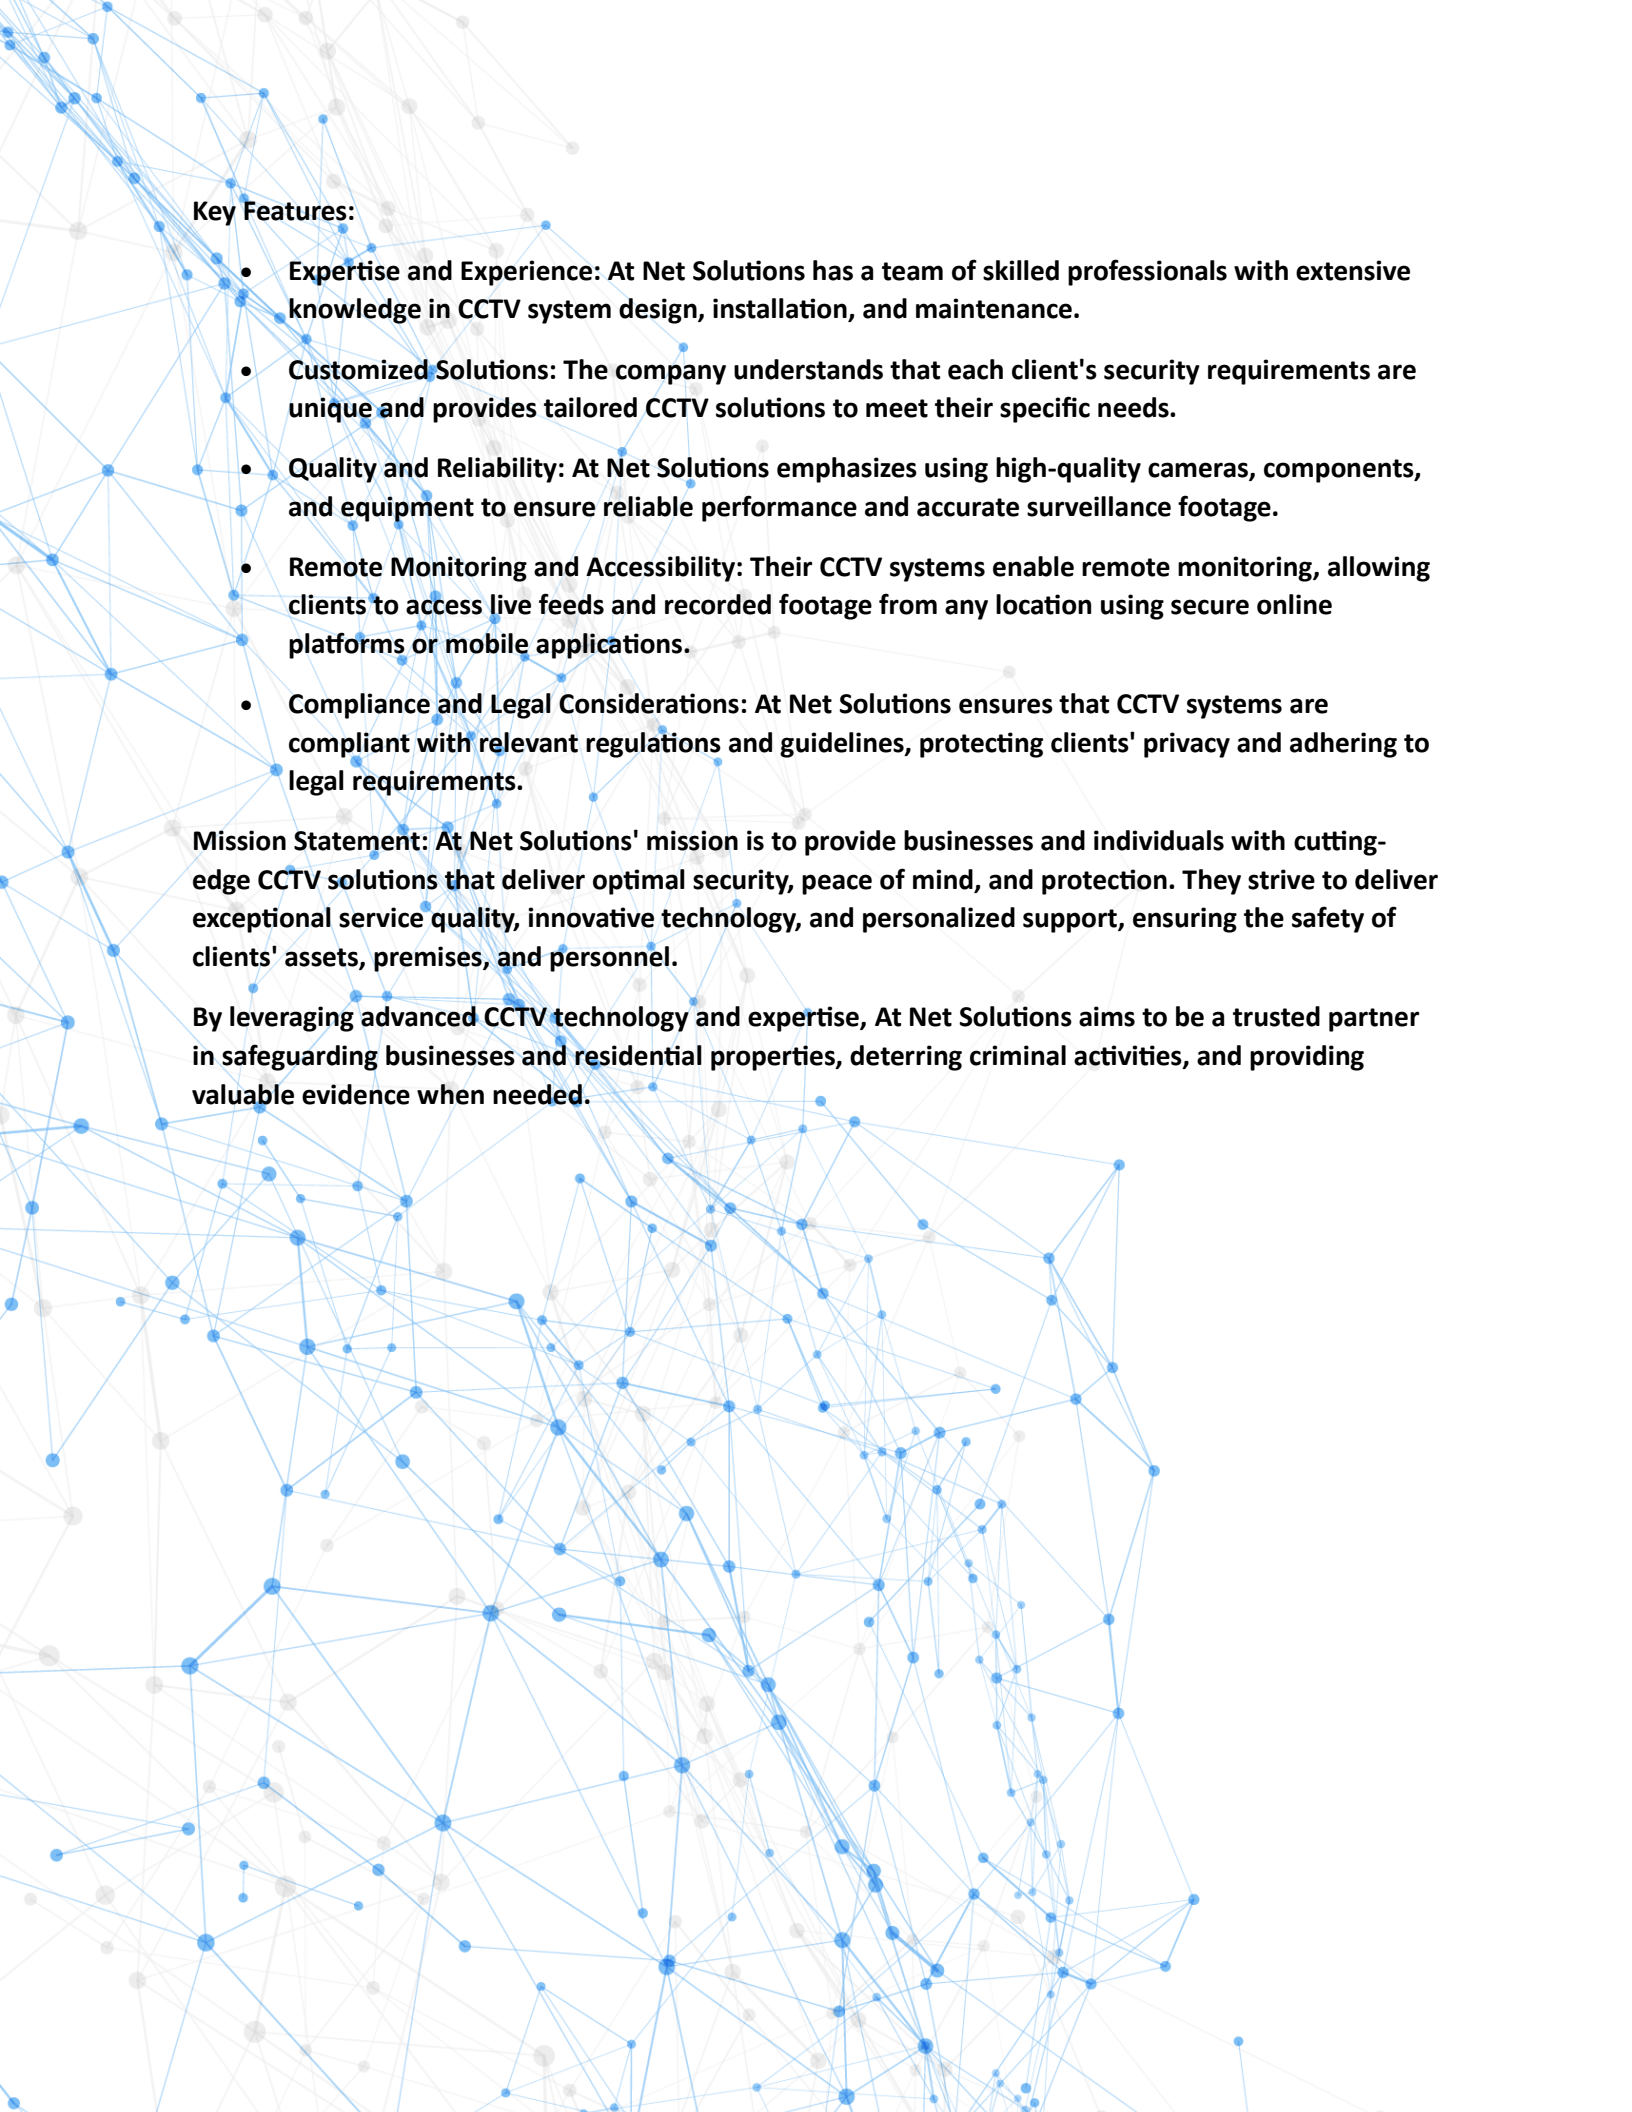

- At Net Solutions provides robust video management systems that enable efficient monitoring and recording of surveillance footage. Their VMS solutions offer features such as remote access, real-time alerts, motion detection, video analytics, and scalable storage options.

5. Maintenance and Support:

- At Net Solutions offers comprehensive maintenance and support services to ensure CCTV systems are operating optimally. This includes regular system health checks, camera cleaning, firmware updates, troubleshooting, and responsive technical assistance.

6. Integration with Access Control and Alarm Systems:

- At Net Solutions integrates CCTV systems with access control and alarm systems to provide a complete security solution. This enables centralized control and monitoring, synchronized events, and enhanced security management.

Key Features:

- **Expertise and Experience:** At Net Solutions has a team of skilled professionals with extensive knowledge in CCTV system design, installation, and maintenance.
- **Customized Solutions:** The company understands that each client's security requirements are unique and provides tailored CCTV solutions to meet their specific needs.
- **Quality and Reliability:** At Net Solutions emphasizes using high-quality cameras, components, and equipment to ensure reliable performance and accurate surveillance footage.
- **Remote Monitoring and Accessibility:** Their CCTV systems enable remote monitoring, allowing clients to access live feeds and recorded footage from any location using secure online platforms or mobile applications.
- **Compliance and Legal Considerations:** At Net Solutions ensures that CCTV systems are compliant with relevant regulations and guidelines, protecting clients' privacy and adhering to legal requirements.

Mission Statement: At Net Solutions' mission is to provide businesses and individuals with cutting-edge CCTV solutions that deliver optimal security, peace of mind, and protection. They strive to deliver exceptional service quality, innovative technology, and personalized support, ensuring the safety of clients' assets, premises, and personnel.

By leveraging advanced CCTV technology and expertise, At Net Solutions aims to be a trusted partner in safeguarding businesses and residential properties, deterring criminal activities, and providing valuable evidence when needed.
